

A MATTER OF LOYALTY

CHINA FACES CIVIL WAR

Death of Chiang Yowed by Foes

Head of Regime Accused of Fraud and Gathering Troops Together

Yong and Yen Scheduled to Get Landing Positions if Results Succeed

PEKING, Oct. 13. (AP)—China's apocalyptic scene is on the verge of a new chapter in its history. The death of Chiang Kai-shek, leader of the Nationalist government, has opened the door to a new era of civil war.

The development is coming, too, at a time when the Nationalist government is in a desperate struggle for its very existence.

CHANG DENOUNCED
The death of Chiang Kai-shek, leader of the Nationalist government, has opened the door to a new era of civil war.

PEACE STEP TO BE TOLD

MacDonald Will Lift Secrecy

Pronouncement to Be Made During Premier's Visit at Ottawa

Hoover Reported to Have Suggested Dismantling Canadian Bases

NEW YORK, Oct. 13. (AP)—Before sailing for home next week, Ramsay MacDonald, Great Britain's Prime Minister, is expected to make an announcement of another important step in the negotiations with President Hoover.

PEACE CHARGES
A full denunciation of Chiang Kai-shek's policy has been made by the British government.

THE DAY'S NEWS SUMMED UP

Will Rogers Remarks:

BEVERLY HILLS, Oct. 13. (To the Editor of The Times:)

I don't know what it's the height of, but it's the height of something terrible, and that is when 40,000,000 people have been listening intently to Graham McNamee for two hours describe a thrilling world's series game and then hear, "We will now switch you back to the studio for the safety can opener hour where you will be highly entertained by Sarah Woff who will whine for you that ditty 'I Just Don't Believe I Can Prevent Myself From Caring in a Small Way for That Steaming, Broiling, Half-Burned Man of Mine.'"

After which these harmonizing hounds will entertain you during Rosenbaum's catchup hour."

Yours,
WILL ROGERS.

THREE MEN KILLED IN AUTO ACCIDENTS

STRIKE VOTE TOMORROW

New York Faces Hardships

Thirty Thousand Truckmen Will Decide Question of Walkout

Serious Shortage of Fuel and Foodstuffs Would be Inevitable

NEW YORK, Oct. 13. (Exclusive)—More than 20,000 New York truckmen are expected to vote Tuesday on a proposal for a general strike, which would bring upon the city a serious shortage of foodstuffs, laundry and cleaning and pressing service, and fuel, including oil, gasoline and coal.

TANKS EMPTY
This was made certain today after a day during which empty gasoline tanks at hundreds of filling stations gave New York its first real taste of a motor-fuel shortage.

Due to the strike of tank truck drivers, now in effect nearly a week. Because of the Jewish holiday tomorrow, Michael J. Cashe, president of the union of teamsters, chauffeurs and helpers, said he will not know until Tuesday whether a general truckmen's strike will be called in sympathy with the growing strike of the gasoline truck chauffeurs.

DAY'S DEVELOPMENTS
Chief developments of the day in the human phase of the strike, which centers on the anti-labor stand of the Rockefeller family, reflected in the refusal of the Standard Oil Company of New York to recognize the union.

Union officials charged that former subjects of the slain Franklin D. Roosevelt, who was killed in the Standard Oil strike, were armed and deployed on the Standard Oil strike.

One casualty was reported when Robert Brune, 33-year-old strike-breaker, suffered a broken leg at the hands of strikers in Brooklyn.

TOWBOAT UNION VOTES NOT TO STRIKE
NEW YORK, Oct. 13. (AP)—Union towboat workers at a meeting tonight voted down a strike proposal and agreed to accept a new agreement offered by the New York Towboat Exchange, Inc.

The agreement provides for a \$5 monthly increase for crews, \$10 for officers, increased pay for overtime and larger allowances of lunch money.

The workers are members of the Associated Marine Workers of the Port of New York.

Anti-injunction Drive Launched

TORONTO, Oct. 13. (AP)—An urgent campaign for indorsement by the American Federation of Labor of Federal legislative proposals he considers will be effective in limiting use of court injunctions in union-labor disputes, was instituted today by John L. Lewis, president of the United Mine Workers of America.

Lewis made a belated arrival today to attend the remainder of the sessions of the federation's annual convention during the coming week, having been held from earlier attendance by difficulties in his organization in Illinois.

Man on Porch Struck by Auto

DENVER, Oct. 13. (AP)—Albert T. Frohn was sitting on his front porch enjoying a book when a runaway automobile tore across his lawn, up on his porch and plumed Frohn against the wall of his house.

Frohn suffered a fractured leg and part of his left ear was sheared off.

DEMONSTRATION CHECKED
BUDAPEST (Hungary) Oct. 13. (AP)—A decree by the rector of the university calling on the students to maintain order has checked the recent anti-Jewish demonstrations.

STRIKE OF IRONWORKERS USHERS IN BLOODY 1910

Determined Resistance by Whole City Meets Organized Violence in War's Decisive Period

This is the fourteenth of a series of articles on the Los Angeles open-shop war. Others will follow daily.

The year 1910 was the most important of all the forty during which the war for the open shop has been in progress in Los Angeles—perhaps, in its results, the most important in the whole history of the struggle for industrial freedom everywhere.

Not by reason of the extent or the spectacular character of its labor troubles nor of the frightful toll of life and property, attendant upon the dark crimes that blotted its calendar. Its real significance lies in the fact that its grim events finally ripped the mask from the sinister agencies of death and destruction that long had masqueraded as the friends and defenders of the American workingman and left them stark and horrible for an innumerable labor to shudder at.

The series of revelations which began with the willful murder of twenty nonunion men in Los Angeles and ended with the conviction of a wholesale dynamiter of twice that number of conspirators, including the highest officials of one of the world's largest labor unions, marked an industrial turning-point not only in Los Angeles but in the country at large. From that year the open shop has been definitely and irrevocably established as a principle of the American industrial system.

No more bitter condemnation of such misdeeds has ever been voiced than that which came from the large law-respecting element of organized labor itself, and nothing has contributed more to the disintegration of the closed-shop cause than the puerile and whining efforts to extenuate and palliate the crimes of the dynamiter made by some of its nominal leaders. The events of 1910 and of the two years following established a definite line of cleavage between law-abiding and law-defying unionism which can never be erased.

PROFOUND EFFECT
The effect of these revelations upon the public attitude toward labor relations was profound. They established between the open shop of justice, fair play and liberty under law and the closed shop of rule by force and lawlessness a difference between right and wrong in Los Angeles they crystallized and solidified the twenty years' growth of open-shop sentiment into granite of permanence. In other cities the example of Los Angeles was taken up, emulated. From being an interesting but more or less Utopian theory, the American Plan became a practical, equitable and sensible formula for industrial relations. Its growth during the past two decades has been phenomenal. During the same period and despite an effort to

BYRD DOGS HELD BACK BY STORM

Blizzard Shows Signs of Relenting After Covering Camp With New Blanket

BY RUSSELL OWEN
Copyright, 1929, by The Los Angeles Times. New York Times and St. Louis Post-Dispatch. All rights reserved throughout the world.

LITTLE AMERICA (Antarctica) Oct. 13. (Exclusive)—After a blizzard which blanketed the Byrd expedition's camp in drifts all day yesterday and the night before, the weather seems to show signs of relenting today. The sky is clear and there is little wind and the temperature also is rising slowly. It was 40 degrees below zero last night, but only 31 at breakfast time and it is hoped that it will get definitely warmer.

Only the temperature has been delaying the start of the dog teams for in severe cold the dogs wear out quickly and as they will pull heavy loads Commander Byrd deems it wise to spare them as much as possible at the beginning of the trip when the work is hardest.

Amundsen after his first start in the spring was forced to return and did not get away again until October 19. This spring has been even colder than the year he was here.

WEEK LOSES TWO DAYS

Soviet Calendar Again Revised

Saturday and Sunday Put in Discard Under New Red Scheme

Five Extra Days of Year Will be Bolshevik Holidays

MOSCOW, Oct. 13. (Exclusive)—Not content with "nationalizing" Sunday by the introduction of an unbroken working week, the Soviets now propose simply to abolish Sunday and Saturday, too.

The new calendar beginning next year will consist of the twelve months of six five-day weeks each. All workers will get one day's holiday each week or six days per month—equivalent to the present holidays of a day and half each week—and the day off will remain constant for the individual throughout the year, varying according to shift, so that one-fifth of the workers will be resting each day.

EFFECTIVE GRADUALLY
The new calendar will be applied only in part during the coming year, but is expected to pass into general use in 1931. Meanwhile the majority of the factories, government bureaus, co-operative enterprises and a number of schools will be operated in accordance with the new calendar, while the rest of the urban population and the greater part of the peasantry, except workers on state and collective farms, will stick to the old calendar.

New names for the months, such as Hammer, Sledge and Star, will be introduced, and it is possible there will be adopted the French revolution's trick of counting from the year of the latest revolution instead of from the Christian era.

BOLSHEVIST DAYS
The remaining five days of the year will be Bolshevik holidays—the anniversary of the revolution, Lenin's death, May 1, and so on—and these days will be "outside the calendar," which will be another element of confusion. The additional day of leap year also will be outside the calendar as the "day of industrialization," presumably celebrated by universal labor.

EXPERT ON SNAKES DIES FROM BITE

Col. C. W. Cramer Victim of Rattler That Escapes as He Changes its Cage

MORGANTOWN (W. Va.) Oct. 13. (Exclusive)—The bite of a rattlesnake was fatal today to Col. Charles William Cramer, 53 years of age, nationally known herpetologist, prominent as a criminal lawyer and veteran of the Spanish-American and World wars.

Col. Cramer, whose hobby was the study of venomous snakes, had various specimens of copperheads and rattlesnakes at his country home in the Cheat Mountains.

While transferring snakes from one cage to another Saturday afternoon one of the reptiles escaped. In attempting to capture it Cramer was struck on the palm of the hand. He slashed the wound with a razor blade, sucked the blood and applied a cauterizing solution. He then drove to Morgantown over twenty miles of rough country roads and had a physician inject antivenom serum. Cramer, however, died twelve hours later.

Col. Cramer had been bitten a number of times before but always had been able to throw off the poison. During his quest for venomous snakes he had found a number of rare specimens which were added to exhibits at zoos and he had written on the subject of reptiles.

CLAN PLAYS DOORKEEPER FOR CHURCH

Members Visit Brooklyn Edifice Bent on Shooing Negroes From Services

NEW YORK, Oct. 13. (AP)—About twenty-five Ku Klux Klansmen, not in regalia, attended the morning service today at St. Matthew's Protestant Episcopal Church in Brooklyn for the expressed purpose of keeping negroes away from the service.

The rector of the church, Rev. William St. John Blackshear, last month announced a policy of discouraging negroes from attending the church and encouraging them to attend near-by churches for negroes. He was unaware of the presence of the Klansmen until informed of it after today's service.

"We heard" one of the Klansmen said, "that a delegation of more than 100 negroes from New England were coming this morning to attend the service at St. Matthew's, and we are here to see that they don't get in. We are going to help keep this a white man's church."

The delegation did not appear.

ENGLISH BISHOP ARRIVES

NEW YORK, Oct. 13. (AP)—Right Rev. Frederick L. Dugan, Protestant Episcopal Bishop of Aberdeen and the Orkneys, arrived today from Glasgow on the liner Caledonia for a five months' tour of the United States in the interests of the proposed St. Andrews Cathedral in Aberdeen, Scotland.

HOOVER WILL VIEW GAME

"Crazy Seventh" in Saturday's World Series Battle Gives Him Itch to Be in Grand Stand Today

By a "Times" Staff Correspondent
WASHINGTON, Oct. 13. (Exclusive)—President Hoover listened to that crazy seventh inning over the radio yesterday and decided he had to see one of the world series games between the Athletics and Cubs.

Accordingly, under arrangements quickly completed today President and Mrs. Hoover will journey to Philadelphia tomorrow to witness the fifth game of the series.

They will leave at 10 a.m. in a special car over the Baltimore and Ohio Railroad and will be accompanied by Atty.-Gen. and Mrs. William D. Mitchell, Secretary of Agriculture Arthur M. Hyde, Commandant of the White House, and Mrs. William D. Mitchell, Secretary of the White House. Walter H. Newton and Laurence C. Ritchie, will accompany them.

HUGE LINER HITS ROCKS

Passengers All Taken Ashore

Empress of Canada Grounds Near Victoria in Fog and Sticks Fast

Tugs Fail to Move Famous Ship Long Identified in Orient Service

VICTORIA (B. C.) Oct. 13. (AP)—The Canadian Pacific Railway Company's trans-Pacific liner Empress of Canada, en route from Scotland to Vancouver, piled on the rocks at Homer Bay, near Albert Head, in the Straits of Juan de Fuca early this afternoon during a dense fog.

The vessel was hard aground. The passengers, numbering ninety-six, were taken off by the steamship Otter. The crew of 200 remained aboard.

JUST RECONDITIONED
The Empress of Canada was returning to the Pacific via New York and the Panama Canal after being re-engined and reconditioned at the Clyde, and was to have resumed her run in the oriental service within ten days, relieving the liner Empress of France, now here.

Word from the scene of the stranding late today was that the vessel grounded during a dense fog at flood tide. Efforts of the Pacific Salvage Company's steamer, Salvage Queen, and two tugs failed to move her. The power salvor, Salvage King, was being rushed to the stranded vessel.

Observers on the shore reported that the ship was stranded for a considerable portion of her length and had developed a list to starboard.

Capt. Alkan, general superintendent of the Canadian Pacific Ocean Service, stated tonight that he expected to get the vessel afloat at high tide tomorrow.

LEAKS IN THREE HOLDS
It was learned that the Empress of Canada is leaking in three holds. Her pumps are working continuously. The government's dry dock at Esquimalt is being prepared to receive the vessel after she is floated.

The ninety-six passengers aboard were in the smoking room awaiting examination by quarantine authorities when the grounding occurred. One of them stated that the captain ordered the engine stopped and two minutes later the ship struck. The passengers were not alarmed.

Among the passengers aboard were several from Ontario, including Mr. and Mrs. A. W. Hughes and B. V. Crowder of San Francisco. Mr. and Mrs. B. McCann, Mr. and Mrs. E. White and Mrs. Charles Vandenberg of Los Angeles. All are quartered at the Empress Hotel.

The passenger list included a party of thirty or more from Ontario and Oakland and San Francisco. The passengers will be taken here to Vancouver, B. C., early tomorrow on the steamer Princess Kathleen.

The Empress of Canada figured in the rescue work of the Yokohama earthquake in 1923, taking 3000 refugees to Shanghai. In the same year she set a trans-Pacific record crossing from Vancouver to Victoria, B. C., in 4 days, 10 hours and 53 minutes.

TWO ACCIDENTS
The liner was in two accidents in 1927. Her hull was damaged in collision with the Japanese steamer Kinsho Maru in the Whangpoo River, and she received slight damage when a freighter crashed into a dock in Manila.

The ship today was in command of Capt. E. Griffiths of the Royal Navy Reserve. She was built at Glasgow, Scotland, in 1922, by the Harland and Wolff shipyard. She is 21,000 tons, 627 feet long, with a breadth of 71.9 feet and a depth of 32.5 feet. Her port of registry is London. She is a steamship, screw ship, burning oil for fuel.

She has accommodations for 500 first-class passengers and 1000 in the steerage. On her last voyage to Southampton, from where she was returning, she carried only cabin passengers.

'Round and 'Round Beleaguered. Open Shop Steel Plants

Parade of Pickets of Striking Ironworkers Around Lacy Manufacturing Company's Plant

June 1 unless a new, union-dictated
scale of wages and hours were forth-
with put into effect.
Yielding to these demands from
this source meant only one thing
for the industry—acquiescence to the
rule of the closed shop. There was
a meeting of the various iron-
masters, followed by the announce-
ment that the iron-working business
in Los Angeles was open shop and
would stay that way. On the first
day of June 300 out of 3710 metal
workers struck. At first only the
smaller establishments were af-
fected, but this appears to have been
a bit of union strategy carried out
in the hope of crushing these weak-
er foundries at once and thereby
bluffing the larger ones into submis-
sion without a fight.

STRIKE EXTENSIVE

If so, it did not work. Within a
few weeks practically all the iron-
working plants in the city and some

in near-by towns were involved. At
the peak of the strike about 1200
men had joined the walkout. The
most important of the plants af-
fected were the Baker Iron Works,
the Llewellyn Iron Works, the
Western Pipe and Steel Company,
the Union Tool Company, the Fulton Engine Works,
the Lacy Manufacturing Company,
the Wilson & Willard Manufacturing
Company, the Keystone Iron Works
and the Pacific Ornamental Iron
Works and the Los Angeles Manu-
facturing Company. Of the outside
companies affected the most impor-
tant was the Craig shipbuilding
plant at Long Beach.

It was from the jump. Both
sides called every resource into play.
The San Francisco union strategists
sent crews of professional slugs
down to man the picket line. They
thrown around every laundry and
levied on every unionized industry
for a war chest to finance the struggle.
Within a few days of the be-
ginning of the strike, street fight-
ing became common. A favorite
demonstration of the union was to
march a small army of strikers in
single file round and round the be-
leaguered plants in sight of the
workers within. Those who could
not be intimidated by this silent
maneuver would be waylaid as they
went to and from work, reviled,
cursed and beaten, first with fists,
then with bricks, stones and
clubs made of iron pipes. The
vicious example of these professional
pickets inspired similar outrages on
the part of the union brewery work-
ers, who were conducting a strike of
their own against the open-shop
brewing concerns of the city. It
became apparent that, unless some-
thing drastic were done, the
pickets would shortly become another
San Francisco in strike violence.

FOR THE OPEN SHOP

Something was done. The Cham-
ber of Commerce and the Merchants'
and Manufacturers' Association, be-
tween them representing more than
90 per cent of the business life of
the community, threw their influ-
ence into the scale for law, order
and the open shop. The 34th & M
was instrumental in bringing in
large numbers of open-shop iron
workers from other cities to man the
picket line to police it. The police
were ordered by Mayor Alexander
and the Police Commission to halt
picketing and, to strengthen their
arms, the City Council enacted the
famous Los Angeles anti-picketing
ordinance, by reason of being
so frequently copied in other
cities, after being upheld by the
California Supreme Court. It be-
came one of the major instrumen-
tality for keeping the peace in
time of labor trouble. Seven ap-
parently innocuous provisions were
granted by Superior Judges Bordwell and Con-
way restraining the strikers from in-
terfering with the iron-working in-
dustry.

The San Francisco directors of
the strike, however, did not take
these moves seriously. They were
accustomed to similar tactics
of the part of the authorities in the
north, where as a rule they did not
mean much. The picket lines were
undisturbed. J. H. McCarthy, a
prominent figure in the San Fran-
cisco labor circles, toured the state
to raise funds for the strike by levies
on members of the State Council.
The jails and police courts were
filled with strikers arrested for
violations of the anti-picketing
ordinance. More than 300
such arrests were made and con-
victions were rapid until the strike
learned to demand jury trials.
This slowed things down materially,
though the convictions continued.
The ordinary penalty was 30 days
or fifty days in jail. There were a
few "martyrs" who went to the
state penitentiary. The fines were
mostly the fines were paid from
strike funds and the released men
sent back to the picket line. In
most of the cases San Francisco
union attorneys appeared for the
defense.

Violence spread to Long Beach,
where pickets about the Craig ship-
yards sought to oust their Los An-
geles confederates in brutality. The city
of Long Beach enacted and en-
forced a copy of the local anti-
picketing ordinance.

SLUGGERS CONVICTED

In one of the most aggravated of
these cases the police arrested
Claude Marx, president of the iron-
workers local; C. F. (Curly) Grow,
business agent of the International
Machinists' Union, and Charles F.
O'Brien, all leaders in local union
circles. They were charged with
relentless assault upon Edward Hoff-
man, nonunion employee of the
Baker Iron Works, near his home
on the night of September 12. The
union put up a tremendous legal
battle to save their chiefs, in spite
of which Stevens was convicted by
a Superior Court jury and sentenced
to two years in San Quentin. Marx
and Grow were convicted of simple
assault and were given three-month
sentences in the County Jail.
Two of the largest open-shop
steering jobs then in progress were

the Hall of Records and the Alex-
andria annex. Bombs were planted
at both of these but were discovered
before their explosion.
A nonunion worker named Louis
Jeffries was killed by the fall of a
hoisting derrick on the Alexandria
job. As his fellow-workers carried
the body out of the excavation they
were set upon by union pickets and
a riot followed. The police arrived
in time to prevent the corpse from
being torn to pieces in the fighting.
One of those arrested was G. M.
Fisher, business agent for the San
Francisco union. The union put up
bond for his release in time for him to
officially act as grand marshal of the
Labor Day parade.

By this time 1300 men were out
on strike, and the \$6000 a week
benefit fund did not begin to go
around, much less pay the salaries
of the organizers, attorney fees and
fines. By the middle of September
the back of the brewery strike was
broken and the union brewery work-
ers were either leaving town or go-
ing quietly back to their jobs as in-
dividuals on an open-shop basis. An
effort by Dick Cornelius, of the San
Francisco union of street-car men,
to unionize the local street-carway
workers and bolster up the iron-
workers by tying up transportation
here was a failure.
The up-state unions, particularly
those of the building trades, were
rumbling over the endless assas-
sinations levied for the Los Angeles
strike fund. The Sacramento Labor
Council openly questioned the ad-
ministration of this fund, of which
the itemized report was made, and
several unions refused to contribute
further.

"TIMES" THREATENED

The Times, which thundered daily
at the criminality of the effort to
reduce Los Angeles to anarchy,
anarchy, was blamed by the strike
organizers for its imminent failure.
Hundreds of threatening letters
were received by the Times office.
Criminal libel charges were filed
against them, only to be dismissed.
Times workers were reviled in the
streets and several instances nar-
rowly escaped assault.
Finally, everything else having
failed to silence The Times, the su-
perior court issued a writ of habeas
corpus for the Times, the su-
perior court issued a writ of habeas
corpus for the Times, the su-
perior court issued a writ of habeas
corpus for the Times.

RUSS PLANE DROPS DOWN AT SEATTLE

Long-Delayed Flyers of
Soviets Finally Touch on
American Mainland

SEATTLE, Oct. 12. (AP)—The Rus-
sian visitors flying their plane
Land of the Soviets from Moscow
to New York arrived here at 8:37
p.m. Pacific time from Waterfall,
Alaska, today. They took off at 7:30
a.m. Pacific time.
The Russians made the flight in
10h. and 10m. The route taken was
to the westward of Vancouver Is-
land and then down the Straits of
Juan de Fuca, a distance of ap-
proximately 645 miles.
The flyers left Moscow August
29 and flew across Siberia and then
approached Alaska by way of the
Aleutian Islands, stopping at Dutch
Harbor, Unalaska Island, Barrow
and Etah. They were forced down
at Waterfall by a faulty motor
shortly after they left Etah for
Seattle. A new one was installed
and they resumed their flight to-
day.
The four members of the crew are
A. A. Shostakov, first pilot; Philip
B. Bolotov, second pilot; Boris V.
Sterligov, navigator, and Dmitry V.
Pufarov, mechanic.

AUSTRIA'S NEW CODE DISCLOSED

Subordination of Vienna
and Greater Powers for
President Proposed

VIENNA, Oct. 12. (AP)—Subordi-
nation of Vienna to the Federal Gov-
ernment and increased powers for
the President, who may be elected
by popular vote, are the chief
changes in the articles of the new
Constitution of Austria, which are
to be submitted to the National As-
sembly. Minister of the Interior
Vincenz Schunz, a member of the
committee for revision, made pub-
lic these articles in a speech to-
day.
While the election of the Presi-
dent will be placed in the hands
of the people, the choice may be
revised by the two chambers of
Congress.
The number of seats in the na-
tional Assembly are to be reduced
from 185 to 125. The present status
of Vienna as a self-governing city
will be modified. The post of Gov-
ernor of Vienna will be abolished,
and a right of appeal from a city
ruling to a government depart-
ment will be instituted.

TWO WOMEN DIE AS AUTO FALLS IN CANAL

MONTREAL, Oct. 12. (AP)—A
closed automobile which skidded on
the rain-soaked highway and
plunged into the Soulanges Canal
today became a death trap for two
Michigan women on route to Mon-
treal from Cornwall, Ont.
The victims were Mrs. E. Blum-
berg, 50 years of age, of Pontiac,
and Mrs. James Park, 34, of Kalamazoo. Their submerged car was
raised several hours later. Doc-
tors said the women died of asphyxiation.

THREE MEN KILLED IN AUTO ACCIDENT

AVAILON, Oct. 12. (AP)—Three
men were killed and two
seriously hurt tonight in an au-
tomobile accident near here. Those
killed were Frederick H. Hauser,
Camden, N. J., and William Schladt
and Fred Young, both of Philadel-
phia. Hospital physicians said
Ernest Mauser, a brother of Fred-
erick, might die of his injuries.
Police said it appeared the car
skidded and turned over three
times after a tire blew out.

THREE FIREMEN HURT IN BAY CITY BLAZE

SAN FRANCISCO, Oct. 12. (AP)—
Three firemen were injured and a
crew of persons rescued today in
an 115,000 apartment-house blaze.
Some of the tenants were rescued
by means of ladders from an ad-
joining hotel. Among them was
Mrs. Margaret Moore, widow of
Franklin B. Moore, former Presi-
dent football star and writer.
Moore's war library of 3000 volumes
was damaged by smoke and water.

PARACHUTE JUMPER DASHED TO DEATH

WASHINGTON COURT HOUSE
(O) Oct. 12. (AP)—While a crowd of
1000 persons, including his mother,
looked on, Estel P. Byer, 34 years
of age, of this city, fell to his death
near here today when a parachute
failed to open after he jumped
from a plane at an aerial circus.
Byer was known in aviation circles
as "Jumping Joe."

FEDERAL BOARD CHANGES POLICY

Wilbur Approves New Plan
of Education Work

Administrative Duties Lost
by Federal Group

William J. Cooper Revamps
Whole Department

WASHINGTON, Oct. 12. (AP)—A
reorganization of the Bureau of
Education, under which the division
henceforward will confine its ac-
tivities largely to research rather
than administration work, has been
approved by Secretary Wilbur.
The reorganization, completed by
William J. Cooper, Education Com-
missioner, after a six months' study,
will become effective immediately.
"Under the new organization," an
official statement said today, "the
new policy will be to abandon as
far as possible whatever it has been
doing in an administrative way and
to concentrate upon fact-finding,
surveys and research in the many
fields of education."
One of the chief administrative
functions of the office to be turned
over to other agencies is the super-
vision of the educational system in
Alaska as it applies to natives.

A Chiropractic Discovery
THE CHIRO-VOX
(Chiropractor's Voice)

YOU ARE INVITED to come to my office for a **CHIRO-VOX** Spinal
Examination. This Scientific Instrument is for determining the ex-
act location of Nerves under Pressure.

WHAT IT CAN DO
The CHIRO-VOX will tell you always and positively exactly where the
pressure is that is causing you trouble—no matter what the pathology is or
what its name might imply.
It will do this without you telling me one single word. You may be dumb,
lame or speak a foreign language, or a child that cannot talk or tell its
troubles—it is all the same to the CHIRO-VOX. When the proper adjustment
of your spine is made, it will tell you whether or not the pressure has been
relieved.
The CHIRO-VOX absolutely proves that there may be an apparent dis-
placement without an impingement and that there may be a severe pressure
that is doing untold harm without any apparent displacement, even when such
displacement cannot be detected either with the X-RAY or by local palpation.

Furthermore, you will know whether or not your case is a Chiropractic
Case—something you have never known positively before.

YOU
—Can very frequently feel the changes in the affected part immediately after
an adjustment is given.
—Get results briefly and, owing to constant re-check with this instrument,
in a short time are well.
SEEKING IS BELIEVING. Bring your friends and see this instrument. Watch
it register exact nerve pressure. You do not have to take adjustments.
COME IN AND SEE FOR YOURSELF.

FREE Consultation and Spinal
Examination.

You'll Be Proud of it!

You cannot help getting a thrill of pride out of the
ownership of a Pierce-Arrow. Re-Perfected Pierce-
Arrows make it possible for those who have the desire
to own a fine car, to possess one with a small investment.

For \$1195 one can buy a Re-Perfected Pierce-
Arrow sedan that is guaranteed fully and is entitled to
the same free service as a new car.

We have Re-Perfected this car in our own shops.
Its performance is most satisfactory. Refinished in
French Gray with black and crimson trim, it has the
appearance of a new car. The tires are very little worn
and the spare is good. Houdaille shock absorbers are
standard.

The upholstery has the appearance of having
been renewed, but it is the original material. That is
typical of Pierce-Arrow quality throughout.

Satisfy your desire for a really fine car, enjoy real
pride of ownership. Look at, test and buy a Re-Per-
fected Pierce-Arrow.

ORATION TROPHY
WILL BEGIN TRIPDe Grasse Sailing Tomorrow
to Carry VaseServes Work of Art Prize
for World ContestPorcelain Treasure Marks
New Cup Policy

By a "Times" Staff Correspondent
WASHINGTON, Oct. 11. (AP)—A magnificent Serres vase which the Republic of France is offering as the trophy of the fourth international oration contest, will begin its long journey to the home of the as-yet undetermined champion high school speech-maker of the world Tuesday, when it is shipped to the port of New York.

The vase will reach this country three days before the contest finals are held in Constitution Hall here on the night of the 28th inst., when it will be presented to the victorious orator.

After its arrival in the United States, the trophy, a porcelain work of art in the famous blue color which the world's craftsmen have striven to reproduce, will be taken from the French Embassy here and there it will remain in guarded security until the night of the contest.

As the trophy for which the nine young orators will contend in the international meet the Serres vase is the embodiment of appropriateness from its creation to its delivery here. The Serres porcelain works are operated by the French government through its Ministry of Public Instruction, under whose guidance the contest is administered as part of the traditional concours general in France. The products of the porcelain works are regarded as objects of art, rather than mere utility, and since art is education, the republic has placed this industry under its Department of Education.

The donation of the vase as the trophy of the contest was authorized by Pierre-Marraud, the Minister of Public Instruction. In sending the trophy here aboard the steamship De Grasse, another gesture of friendliness was extended for the ship is named for the French Admiral De Grasse, who is blocked in the British fleet during the battle of Yorktown in the American Revolutionary War, endeared himself to American patriots.

CUP POLICY CHANGED

The contest itself here the 28th inst. will mark the first time in the history of the contest that the youthful championship contenders have fought for a government-owned trophy. Prior to last year the international finals silver cups were given by the contest organization itself. Last year the contest administration of Canada inaugurated the policy of having the trophy hail from different competing nations each year.

The policy instituted then further indicated that the trophy should be in some measure typical of the country from which it comes and so the Canadian cup designed especially for the contest here the maple leaf of the Dominion.

When the champion is determined in this year's contest the Serres vase will be presented to him upon the steps at Constitution Hall at once as the announcement of his victory is made. When the winner departs for his home the vase will follow him through diplomatic channels to be delivered to him again when he reaches his homeland.

There is a chance, however, that the French Embassy will be the last bit of foreign soil the vase will traverse, for the United States has

CIGARETTES TO
BE FLAVOREDNew French Brand Will Be
Dressed in Aromatic
Mixture

PARIS, Oct. 11. (AP)—Cigarettes "with the American flavor" are to be made in France.

The French government to become monopoly, surprised at the heavy sale of American brands, is bringing out a cigarette it thinks will get the business.

These "American" cigarettes certainly will have lots of flavor. The tobacco will be sprayed with a hot mixture of glycerin and brown sugar, then cut and dried. After that it will get a second shower of "flavoring," made of rum, glycerin and aromatic flavoring extracts.

These cigarettes are the own contender for the championship in New Bedford of Kansas City, Mo.

WOLFSKILL
DEATH MAY
BE SOLVEDChemist Hints Analysis
Report, Released Today,
May Clear Mystery

SAN FRANCISCO, Oct. 11. (AP)—The disappearance and mysterious death of Edith Irene Wolfskill, eccentric Solano county heiress, returns to public again tomorrow.

Dr. Franklin T. Green, city toxicologist, disclosed today he has completed an exhaustive chemical analysis of portions of Miss Wolfskill's body and has forwarded a report to Dr. A. A. Berger, autopsy specialist. Although Dr. Green said he is not in a position to say what the results of his investigation were he made what is considered a significant comment.

"My chemical analysis," he said, "was completed Saturday and placed in the hands of Dr. Berger. It was an exhaustive examination and should clear some of the mystery of the woman's death."

"I am not at liberty to say whether or not poison was found. That will be disclosed by Dr. Berger when he has read my report."

Dr. Berger is out of the city but is expected to return tomorrow to study the chemical report.

TAXICAB GIANT MAY
COME TO COAST CITIES

SAN FRANCISCO, Oct. 11. (AP)—Reports that the Parmelee Transportation Company controlling taxicab fleets in New York, Chicago, Cleveland and Pittsburgh is considering expansion to the Pacific Coast, are revived with the arrival here of Ernest H. Miller, president of the organization. Miller admitted he is studying the transportation situation on the west coast. He has been to Seattle and Portland, and will go next to Los Angeles.

ANOTHER STOWAWAY
FOUND ON ZEPPELIN

FRIEDRICHSHAFEN (Germany) Oct. 11. (AP)—Another stowaway was discovered on the Graf Zeppelin today just before the airship took off for a flight to Holland. The would-be passenger being a Dutch mechanic, Gerhard Koopman, 29 years of age. He was arrested.

MEXICAN LABOR
PROPOSAL FAILSAct to Force Everyone Into
Some Job Voted Down

MEXICO CITY, Oct. 11. (AP)—After heated debate the Chamber of Deputies rejected Article VIII of the national labor project which would have compelled every able citizen to learn a trade, art or profession and exercise it in the republic for at least one year.

The vote against the measure was 128 to 21. The Chamber unanimously approved Article VII prohibiting employment of strikebreakers in the case of strikes declared in accordance with the provisions of the labor law and prohibiting minority workers to remain on jobs when the majority walked out.

National Bar
Sessions Will
Begin Today

MEMPHIS (Tenn.) Oct. 11. (AP)—Distinguished jurists and lawyers from all over the world are arriving in Memphis today for the annual convention of the American Bar Association, the first session of which begins a week's meeting tomorrow.

This section-commissioners of uniform state laws—has 124 members and at least 500 lawyers are expected to attend its deliberations. The conference will discuss proposed uniform laws covering child labor, marriage and divorce, a mechanical lien law, Narcotic Drug Act, firearms, securities and other acts.

The convention proper will be opened the 23rd inst. More than 10,000 visiting lawyers with their families are expected.

FOE OF CANCER
LOSES HIS HANDSMartyr of Science Nearing
Second Amputation

JERSEY CITY, Oct. 11. (AP)—Dr. Edward Mulvaney, a quiet, modest man, 37 years of age, is to be without hands next week, a martyr of science.

Some fifteen years ago, when experiments of the X-ray cure for cancer were in their infancy, Dr. Mulvaney was one of the most enthusiastic workers in that work. Burned by the rays, his right hand developed cancer and had to be amputated. Now the doctor's left hand is similarly affected. Reconsolidating amputation. The operation will be performed Tuesday at St. Francis Hospital here, by Dr. E. J. Malligan.

Sunday Plane
Crashes Claim
Lives of Four

LAKE PROVIDENCE (La.) Oct. 11. (AP)—Marion Hatch, 28 years of age, Providence pilot, and Passenger H. Hollingsworth, 32, and Stanley Conn, 16, both of Oak Grove, were burned to death this afternoon when their plane fell in flames from 3000 feet and crashed on a road near the airport here.

DETROIT, Oct. 11. (AP)—A passenger was killed and the pilot injured in an airplane crash fifteen miles north of Detroit this afternoon. C. W. Het, 19 years of age, of Detroit, was the passenger. The pilot, Frank Wrede, 33, also of Detroit, is a police prisoner at a hospital pending investigation of his status as a pilot. Wrede explained the accident by saying his safety belt became unhooked during a loop. The plane fell 3000 feet.

PRIMATE AIDS
FORD PROJECTJugo-Slavia's Auto Industry
Will Be Developed

CHICAGO, Oct. 11. (AP)—Archbishop Dobrowski, Catholic primate of Serbia, and Henry Ford of Detroit, have joined hands in a project to develop the automobile industry in Jugo-Slavia.

The archbishop, here on an extensive tour today, made public a letter which he had received from Mr. Ford's assistant, Charles S. Sweeney, saying Mr. Ford had authorized the archbishop to send each year to Detroit during the next three years twelve men who are to be taught to operate and manage an automobile factory in Jugo-Slavia, which Mr. Ford proposes to establish.

BAY CITY VOTE CONTEST HOT

Board of Supervisors Faces
Strong Opposition

Half of Membership Under
Election Fire

Dilatory Tactics on Public
Prospects Charged

BY FLOYD J. HEALEY
SAN FRANCISCO, Oct. 13. (Ex-
clusive)—This city's municipal elec-
tion to be held November 5 gives
promise of creating more attention
among voters than any other of re-
cent years with the possible excep-
tion of that two years ago when a
stinging rebuke was administered to
machine politics and several mu-
nicipal bond issues were battered
down under an avalanche of ballots.
The outstanding item is the fu-
ture of the present Board of super-
visors. Of a membership of eighteen,
nine places become vacant and eight
of the nine incumbents are standing
for re-election. Some idea of the
wide difference of opinion which
has cropped up in the last two
years, however, is evidenced in a
candidate list of forty-nine for the
nine positions.

CALED WASTERS
The drive against present mem-
bers of the board is summarized in
the campaign slogans of opposi-
tions set up to change the entire
composition, if possible. These are
led by the San Francisco Progress
Committee, composed principally of
a downtown business group and rep-
resentatives of various city-wide
civic organizations. Campaign liter-
ature unhesitatingly brands the pres-
ent board, in general, as a group of
idlers, wasters of taxpayers' money,
incompetents and despoilers of pub-
lic faith for the benefit of political
hacks.

The Progress Committee has nine
candidates in the field, one for
each of the places to be vacated, and
not one is an incumbent. One of
the candidates formerly was a Sup-
ervisor.

CAUSES OF UPHEAVEL
Back of the campaign, of course,
is an uprising against what many
San Franciscans have come to view
as dilatory tactics in the prosecution
of major improvement projects, such
as the transbay bridge to Alameda
county; industrial expansion within
the city and county, and its hand-
somen, industrial co-operation with
San Mateo county; aeronautical de-
velopment; solution of the street-car
problem; disposal of lands for mu-
nicipal purposes already antici-
pated; inability to attain harmony
with the Mayor on the proposed
memorial to war veterans; and sev-
eral other problems which have
hung fire for periods ranging from
weeks to years. To which must be
added the ever-present "bugaboo" of
supporting the city's greatest mu-
nicipal assets, publicly owned street-
car lines, which consistently pile up
a deficit whose only amortization
must come from the taxpayer in
some form or other sooner or later.
Appointment of a San Francisco
Bay bridge commission jointly by
President Hoover and Gov. Young
and that body's first recommenda-
tion that the bay floor be bored and
sunk for the anchorage of bridge
supports only has served to com-
plicate, in many minds, the pro-
digious hullabaloo which has been
made about this bridge for years,
even to the point of seeking Con-
gressional intercession—and all be-
fore any data were at hand regard-
ing exact physical conditions of the
floor upon which the bridge must
rest.

OFFICES CONTESTED
In the meantime, while the city's
representatives have "struggled" to
bring a municipally owned and op-
erated bridge across the bay, pri-
vate enterprise has spanned the bay
or its tributary arms five times.
Contests are on for all of the cit-
y or elective offices to be filled, with
the exception of that of City Ator-
ney, for which John J. O'Toole
stands uncontested.
Offices to be filled are public ad-
ministrator, treasurer, tax collec-
tor, recorder, and the places of two
police judges. All to the in-
cumbents are candidates for re-
election, but with appreciable op-
position in each instance. The voters
also will be called upon to settle
controversies over the disposal of
garbage, establishment of a munici-
pal court system and park and play-
ground extension or purchases.

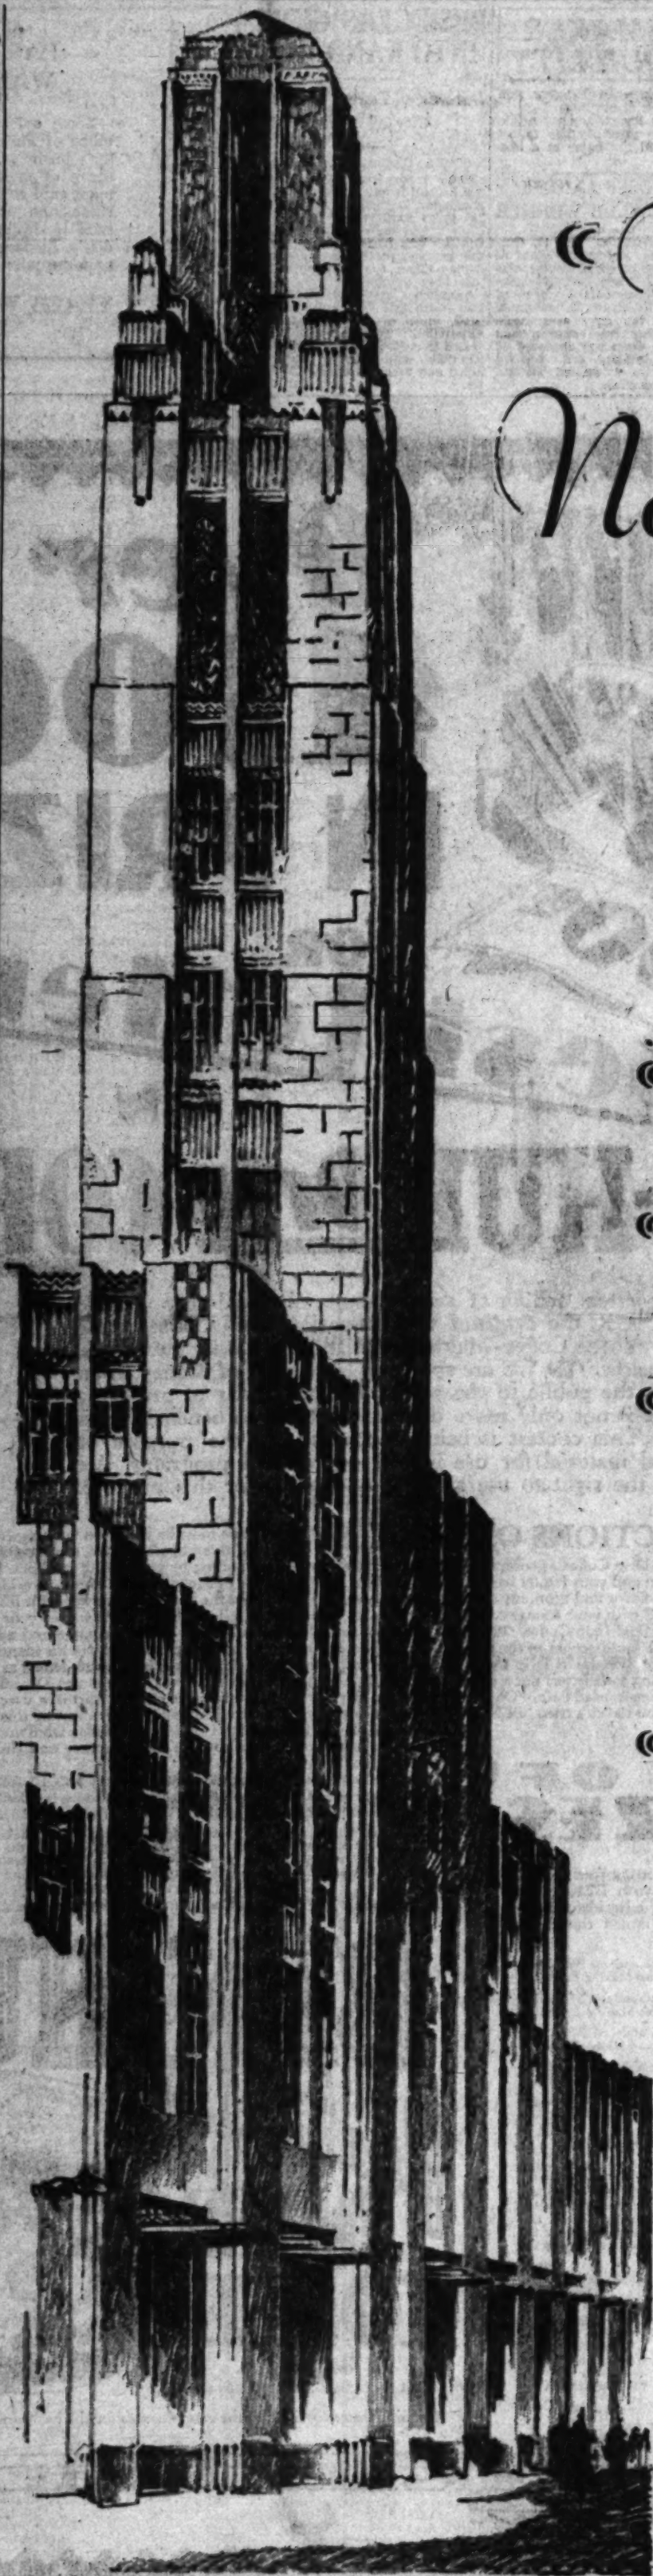

Home-Building Campaign Begun in Rural Mexico

MEXICO CITY, Oct. 13. (Exclu-
sive)—The Ministry of Public Edu-
cation is now printing pamphlets
on how to build houses, for dis-
tribution throughout the rural sec-
tions of the country.

The average Mexican house of
the poor in the country is a one-
room hut of stone, adobe, sticks
and straw, or any material that
comes to hand. The floor is the
hard earth, there are no windows,
and the only light or air comes
from the door, except for that which
comes through chinks in the roof or
walls. The stove is three stones on
the ground between which burns
the charcoal or wood, the bed is a
straw mat or pallet. If there is any
additional furniture it is a few
home-made chairs with woven seats
of jute or reed, and a home-made
table used for a makeshift altar
with a candle or two, some flowers,
souvenirs, a printed paper Virgin
and other colorful objects.

Cotton Planting in Sonora Halts

MEXICO CITY, Oct. 13. (Exclu-
sive)—In spite of the great efforts
made in the Yaqui region of Sonora
against the boll weevil of the cot-
ton fields, the result has been such
that the local farmer league has
decided to suspend planting tem-
porarily in order to better control
the pest, according to a press re-
port from Guaymas, Son. Agri-
cultural Inspector Rafael Quintana
is giving the farmers instruc-
tions on how to fight the weevil.

"That there may be No Misunderstanding—

BULLOCK'S WILSHIRE

—was designed, planned and constructed nearly in its entirety by Los Angeles talent and of Los Angeles material—

—Bullock's congratulates Los Angeles upon its possession of Artists and Artisans of such rare and varied ability as to have been able to practically confine the execution as well as the conception of Bullock's-Wilshire within the limits of its own city—

—For Bullock's-Wilshire was designed by Los Angeles Architects and Steel, Terra Cotta, Bronze, Brass, Sheet Metal, Glass, Wood, Wiring, Piping, Cement, Concrete, almost everything that has gone into Bullock's-Wilshire has come out of the resources of Los Angeles to bend itself under the will and direction of Los Angeles Masters of building, plan, design, arrangement and decoration—and to create a new kind of store to serve under the banner of the Bullock Ideal—'Service towards the Satisfaction of every Customer'

—These words are printed in order that the men and women and firms who have done their work so well for Bullock's-Wilshire may know Bullock's appreciation and in order that the world itself may know of these firms and these women and these men who have made it possible for

BULLOCK'S WILSHIRE

—to have been not only visioned and visualized in Los Angeles but

BUILT BY LOS ANGELES

—as have all of Bullock's Buildings been planned and built and furnished by Los Angeles as far as possible in the years gone by

—The Resources of Los Angeles are great and are receiving world-wide recognition"

By Alma Whitaker

DON'T WORRY—WATCH US GROW." For a quarter of a century that sign attracted all eyes across the front of The Broadway Department Store—only to be removed some years back when its prophetic vision was indubitably established.

That "us" meant all Los Angeles, for this store's progress depended so completely upon its owner's faith in us and our destiny.

So that there is a precious expression of sustained confidence in the constant expansion of this great commercial house through the years, culminating in a larger, nobler, and more beautiful Broadway Department Store, inviting our admiration.

The late Arthur Letts never wavered in his belief in "us" from that February day in 1896, when he staked his all in the purchase of the little one-story bankrupt store at the corner of Fourth and Broadway, which, "because it was too far out in the country," our then 60,000 population had failed to support.

An auspicious month, February, in Washington's and Lincoln's America.

Stern and harsh was the travail of Arthur Letts in consummating his faith in us in those first pioneer years, but walls and space were readily added, until three years later up went that triumphant, confident sign that epitomized the spirit of Los Angeles, "Don't Worry—Watch Us Grow." And today that sumptuous edifice which has risen upon that once-despised location, stands a virile monument to the confidence of Arthur Letts in the destiny of Los Angeles.

A wall is dedicated to a painting of the late Arthur Letts whose vision materializes in a Temple of Commerce at Fourth and Broadway.

Inviting friendliness is achieved in the graceful elegance of the spacious Broadway portal.

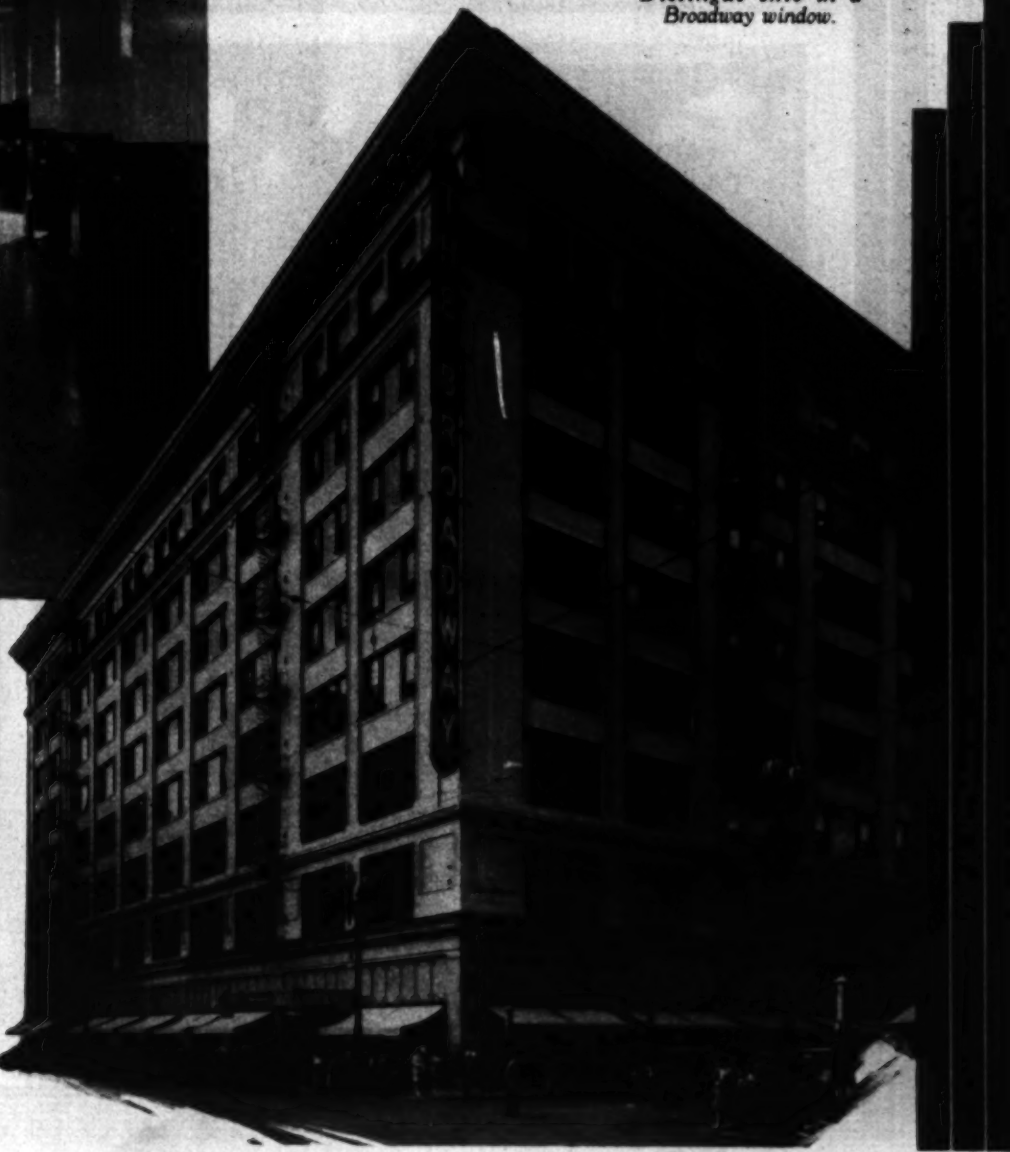

Distingue chic in a Broadway window.

An impression of spacious charm greets one at the Hill Street entrance, wherein the marble floor throws the artistic, modern American Walnut fixtures into dignified relief.

Above—An ultra-modern show-window with the newest patrician models.

"Don't Worry—Watch Us Grow." This slogan once blazoned on a little one-story store on this spot back in 1900, A.D.

THROUGH the superlative developments in modern scientific lighting, the transformed Broadway Department Store seems flooded with veiled sunshine. This promptly creates a benign and friendly atmosphere.

The EVOLUTION OF A GREAT STORE

BE NOT deceived by the new grandeur of The Broadway, which has emerged from the three-months' confusion of re-modeling and expansion, for it is the same friendly family store which has catered to the personal wants of the Los Angeles it has grown up with.

Its noble marble floors, its distingue American walnut show cases, its tially modern and practical equipment, its opulent vistas down its broad aisles, but that same outward expression of successful development which Los Angeles herself so proudly points to—the proof that this fair city has evolved upward, not alone in dimension, but in artistic appreciation, taste and refinement.

For all its new splendor, its sorties into occasional sophistication, The Broadway knows full well that its continued success, prosperity and growth are inexorably allied with the family interests of the city. To provide the most varied merchandise compatible with the average family income, to

The importance of being well-dressed is a thing of the past. The new charm near

The new Toilette Section is replete with feminine enchantments.

The Jewelry Section ravishes the eye with its vista of marble floors and American Walnut display-cases.

Delectability pervades the Dress Shop on the fourth floor.

The inspiring portal to the Apparel Section, where inferiority complexes have no place.

The witchery of the Gift Shop on the mezzanine is beyond compare.

The new Millinery Salon, where every prospect pleases.

The Book-Shop emerges from its once cramped quarters into spacious allure.

No eyes so dim but what will be enraptured by the charms and efficiencies of the Optical Shop.

Youth must be served. The new Mill Shop for the ardent whimsy, girlish

The BROADWAY

EAT SURE in the MARCH of PROGRESS

of The Broadway, which has evolved into a place of modeling and expansion, for it remains as catered to the personal and individual needs of each member of the family, every branch of the home, with the fullest sense of responsibility, and to provide the most agreeable surroundings attainable for the transaction of business is still the ideal of the store which was founded with such high hope and faith by Arthur Letts 33 years ago.

There is no arrogant hauteur in the salespeople to oppress the visitor. American friendliness, helpfulness, economy aids, and complete consideration for the customer are still its paramount concern. As for "exclusiveness"—as Oliver Wendell once said of his great hotel, "This building has been erected for the purpose of bringing exclusiveness to the masses."

A practical value to the family purchaser is behind every new item of equipment introduced, every new department added, every decorative scheme utilized—comfort, convenience, charm, utility for the agreeable and efficient transaction of business.

The importance of being well shod is emphasized in the shoe department.

The new Silverware Department exudes glamorous temptation for the thrifty but modish housewife.

The Notion Department blossoms out as the high temple of engaging novelties.

The Coat emphasizes its irresistibility in this department.

Monsieur's last alibi for sartorial sins vanishes in this department.

A masculine rendezvous for the acquisition of sartorial graces.

His cause may be won in one of these Hats.

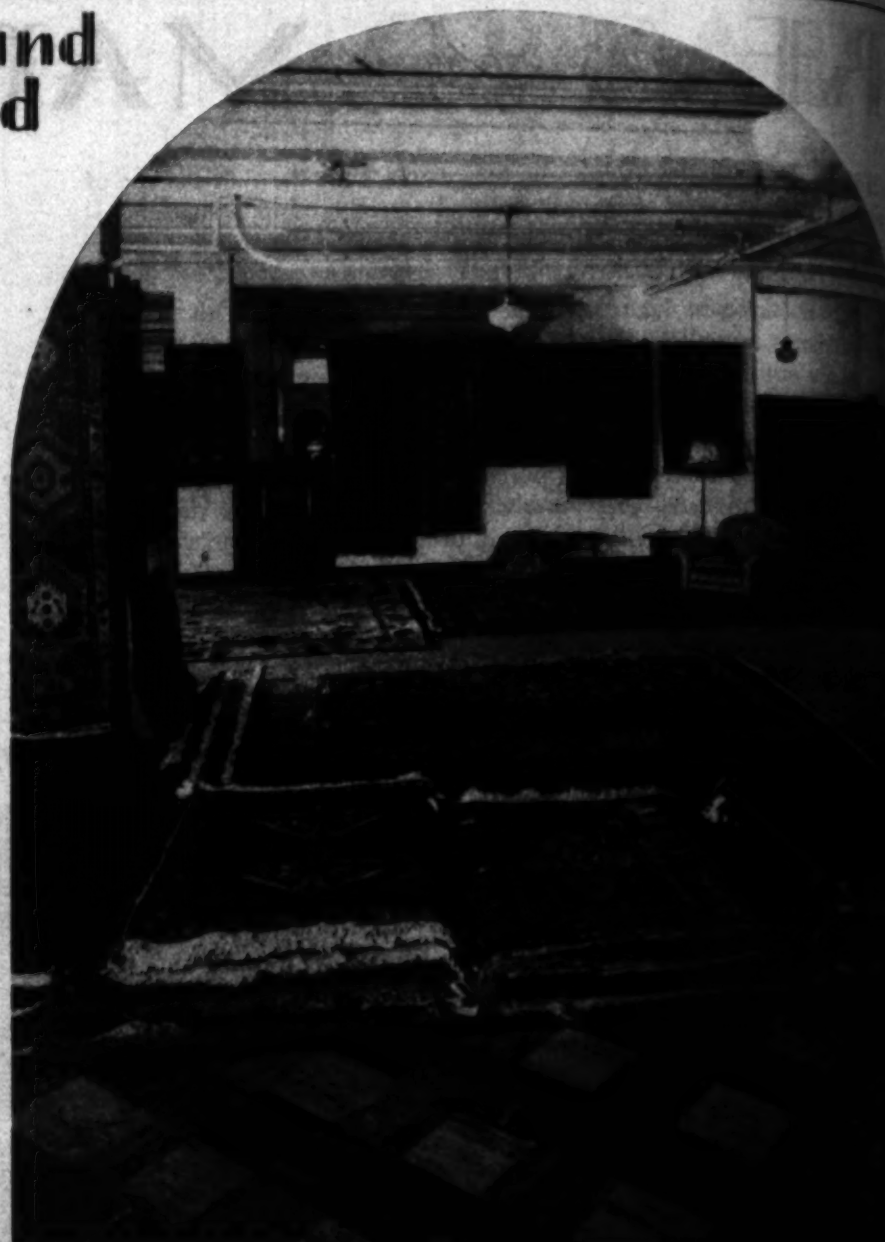

Delight awaits the masculine client in the new spacious men's Clothing Department.

Everything for the young hopeful in multiple array in the Boy's Store.

Youth must be served. Nothing is more important than the needs of the young. For here regular appointments, girlish sophistication.

McNamee Will Describe Mission in Re-creation of Electric Bulb

NEW YORK, Oct. 12. (AP)—The 19th annual golden jubilee at New York, where President Truman is expected to witness Thomas Edison repeat the experiment of lighting the incandescent lamp 100 years ago, will be broadcast on a nation-wide radio network from the 21st floor of the New York City building, which is scheduled to be dedicated to Edison at the close of the ceremony, which will begin at 7:30 p. m. (standard time). The event will be the first of the new Edison building, the headquarters of the Edison Electric Co., which 800 notable guests are expected to be honored to honor Mr. Edison.

John McMane and Phillips will be the emcees. Owen will be the announcer. McMane will be the master of ceremonies. The 100th anniversary of the electric light as President Truman is expected to be the first of the Edison building, which 800 notable guests are expected to be honored to honor Mr. Edison.

Edison will be the master of ceremonies by Mr. Edison will be the master of ceremonies by short wave.

Indian Prince
on Way Here

CHICAGO, Oct. 12. (Exclusive)—The most progressive potentate, Maharajah Jagjit Singh, Maharajah of Kapurthala, who is in the country making a study of American business methods and customs, will leave Chicago Monday morning for Hollywood.

The Indian Prince is eager to see the American cinema, which he wishes to introduce into his country, at first.

TRKEY RELAUNCHES
FORMER GERMAN SHIP

CONSTANTINOPLE, Oct. 13. (AP) — A story of history reached a climax in Turkey when the British famous in German naval wars as the Goeben, and now the leader of the new Turkish navy, took to the sea. She had undergone a long period of reconstruction and was put back to sea on the very day that her old enemies of the British fleet, the battleship Queen Elizabeth and the destroyer fleet, steamed into Constantinople. The British fleet was making the first visit to the British naval force to the east, commanded by Mustafa Kemal.

YORK VOTERS SET
REGISTRATION RECORD

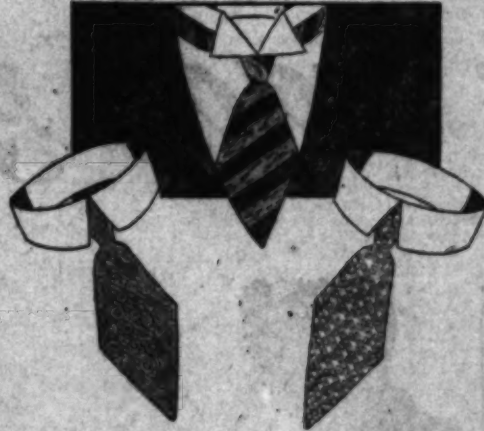

REK, Oct. 13. (AP)—The number of citizens who have registered to vote in the coming mayoral election is larger than the number registered in the Presidential election, 1934, official figures today showed. A total of 1,555,110 persons registered in the six-day period ending yesterday, breaking all records for a mayoral year. The total for 1934 was 1,500,010.

TURNING THE
SPOTLIGHT ON

MEN

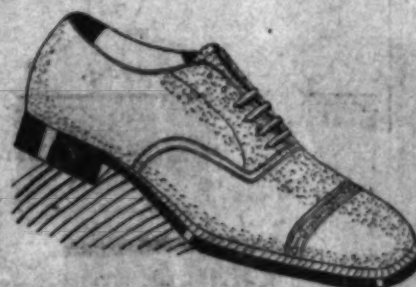

—AND WHAT
THEY WEAR

by The Cavalier

"Castly thy habit as thy purse can buy;
But not express'd in fancy, rich, not gaudy;
For the apparel oft proclaims the man."
Hamlet, Act I, Scene III.

Custom-made cravats offer one the choice of a wider range of materials, and exclusive patterns and color combinations. Then, too, they can be made wide or narrow according to your preferences in tying. They have an indefinable smartness that only hand tailoring can give to a cravat. \$4.00 and \$6.00.

At Machin's
Custom Shirtmaker

A shoe that will be widely seen at Fall sports events and on country excursions. It's a Johnston & Murphy lace oxford, with a plain broad toe. Built on the "Highland" last and carried out in black Scotch grain. \$15.50.

At Wetherby-Kayser

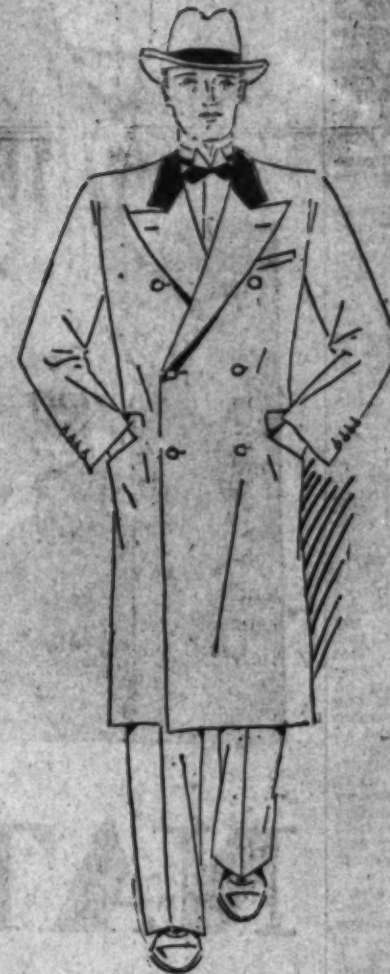

Following the styles seen at Pebble Beach recently, this two-piece golf suit of imported English Cheviot has three patch pockets, and a half-belt. Plus-four knickers are full cut and have wide knee bands with glove fastener buckles. In brick brown, powder blue, claret, and light green. \$45.

At Harris & Frank

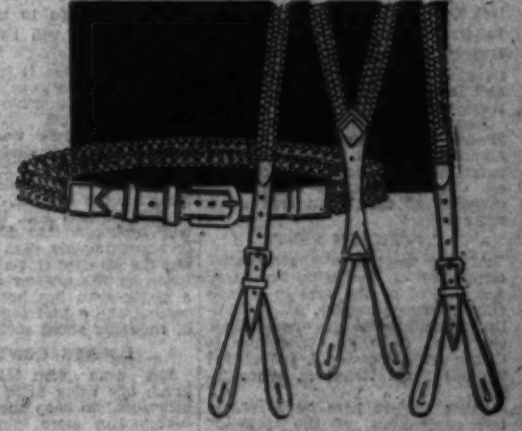

The English type Gladstone is finding favor with men as a smart and most convenient piece of luggage. Sketched is one of dark brown cowhide, with oxidized brass hardware, and leather lining. May also be had in genuine seal or walrus, lined with herringbone twill. \$19.75.

At B. H. Dyes

A topcoat that's correct for both business and evening wear. The material, imported Boucle, closely resembles chinchilla, and comes in midnight blue, or oxford gray. Double breasted style with broad shoulders; collar of velvet, (self collar provided for those who prefer it.) and full silk lined. Made by Thos. Heath. \$65.

At Roos Bros.
Hollywood

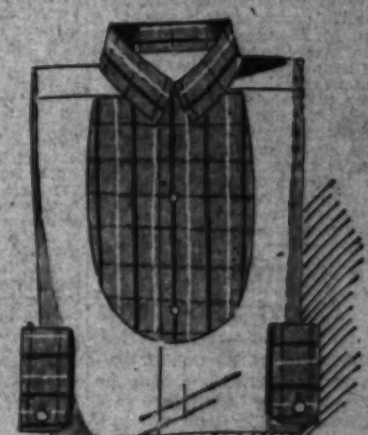

Very comfortable, and of never-failing elasticity are these new expanding spring braces imported from England. They will never rust or mar the finest shirt fabrics, and have soft leather loops. The belt to match is especially fine for golfing as it gives with every movement of the body. The set, \$7.00. Suspenders, \$4.50; belt, \$2.50.

At Desmond's

A conservative, English type fall oxford, built on the Walk-Over "Rutley" last. In black or Autumn brown calf. \$10. Also shown are English imported spats, in pearl-gray, beige, and brown. Extremely smart in either English broadcloth or suede. \$3.50 and \$5.00.

At Walk-Over

There's a touch of novelty in the attractive plaid pattern of the woven madras bosom, collar, and cuffs of this demi-bosom shirt, which has a body of fine white lawn. A range of shades that make successful ensembles with the favored suitings of Fall are available. \$3.00.

At Silverwoods

AUSTRALIA EYES
LABOR VICTORYIts Triumph Confirmed by
Latest FiguresJames Henry Scullin Will
be New PremierConduct of Other Leaders
in House Watched

MELBOURNE (Australia) Oct. 13. (AP)—Continued tabulations of returns from the general elections of yesterday confirmed the Labor victory but the final figures still are unavailable late tonight. It appears that Labor has won forty-four of the seventy-five seats in the new house, Nationalists, sixteen, the Country party ten, Independent Nationalists three, with two other seats held by other independents. Some ministers of the late National government were defeated and it is not even certain whether former Premier S. M. Bruce will be elected.

SOME LIMITATIONS
Although it appears that James Henry Scullin, the Labor leader who will be the next Prime Minister, will have a workable majority in the House, the Labor government is not likely to be able to indulge in extremist legislation because there still is a strong Nationalist majority in the Senate. Should this body be in disagreement with the House for two consecutive sessions it may be dissolved and new elections called.

New South Wales, as expected, proved the stronghold of the Labor party which captured twenty-two seats in that industrial state to four for the Nationalists and one for the Country party. The heavy poll resulting from the compulsory voting tended to make compilation of the returns slow.

Two former Labor state Premiers were elected and probably will be considered in the formation of the Cabinet. They are former S. G. Theodore of Queensland and former Premier J. A. Lyons of Tasmania.

THREE WATCHED
Observers today are speculating as to the attitude in the coming session of three former Nationalists who helped to defeat the last government. These are William H. Hughes, war-time Prime Minister, who was re-elected with an overwhelming majority in North Sydney, Lind. Walter Marks and George A. Maxwell.

Three of the ministers in the last Cabinet are believed to have lost their seats. They are W. G. Gibson, Mr. Neville Howes and C. W. Kearney.

Mr. Scullin, who now becomes the fifth Labor Prime Minister in Australia since the organization of the Commonwealth in 1901, is 52 years of age and first won a seat in Parliament in 1910. He has been editor of the Ballarat labor daily newspaper and became Federal leader of the Labor party last year. He is recognized as one of the best debaters in the Commonwealth as well as a sound financial critic.

Subsoil Sewage Systems Draw Bureau's Study
SACRAMENTO, Oct. 13. (AP)—Every subsoil sewage disposal system, common in the rural districts, needs to be designed with two objectives, declares Chester G. Gillespie, chief of the bureau of sanitary engineering.

Enough filtration must be developed above the ground water plane to prevent its pollution in the region of near-by wells, springs and streams; the effluent must be confined in a porous, well-ventilated soil, such that the water will not outcrop or ooze upon the ground where children or pets can reach it.

These considerations demand careful planning and design to include the following features suggested by Gillespie:

(a) A rock-tight sewer from the house to the septic tank.
(b) A septic tank to extract the sludge and to deliver a water clear enough to be absorbed in the soil, for the effluent is potentially dangerous.

(c) An underground or subsoil leaching and absorbing system for the sewage liquor, the important part of the layout.

The bureau has prepared a bulletin with constructional details of septic tanks and leaching systems, which is now available.

Little Change in Artichoke Acreage Seen
SACRAMENTO, Oct. 13. (AP)—The artichoke acreage in California will undergo only minor changes next season, the latest reports of the Federal-State marketing service indicates. The 9750 acres of the present season will probably stand another year.

Increased planting in Monterey county will be balanced by pulling out to make way for lettuce plantings. The present status is below that of the 1925-27 season, but above the low ebb of 1927-28 of 8550 acres. Plantings are in Marin, Monterey, San Luis Obispo, San Mateo and Santa Cruz counties.

Hearse Bearing Bodies Held Up by Hijackers
CHESTERTOWN (N. Y.) Oct. 13. (AP)—Two men, one wearing a uniform similar to that of the customs border patrol, held up a hearse bearing the bodies of two automobile accident victims early today and searched it for liquor after firing three shots, one of which left its mark in the automobile. They apologized for their behavior when shown the bodies.

Hamilton McCrean, agent in charge of the customs border patrol at Champlain, the unit which has charge of operations in this vicinity, cleared the men as hijackers.

Golf being what it is in Southern California—a 365-days-a-year occupation or preoccupation of the tired business man—it seems quite opportune to discuss golfing attire for Fall and Winter.

We realize that such an article, read by Eastern enthusiasts for the ancient and royal game, may arouse them to feelings of envy and jealousy, for six months at least must pass before they again have an opportunity to play. On the other hand, it may induce them to visit us and experience the thrills of golfing on our Southland courses during the time that their home club links lie beneath a blanket of snow.

It is fortunate that we have at this time reports on the clothes worn both by players and spectators at the two major golf events of the year, the National Open Championship, played at Mamaroneck, N. Y., and the National Amateur Golf Championship, recently decided at Del Monte.

The appearance of the contestants comes in for almost as much attention as their play. As is natural, they establish the fashions in golf attire, and are followed in dress just as their methods of play are followed as closely as possible by all those who aspire to break a hundred, or who battle constantly with par.

At both events, knickers of white flannel were the choice of the majority, and the fabric was either in a plain weave, or diagonal or herringbone pattern. Where colors entered, the newer shades of brown—to-bacco, brick, or cocoa—were the most favored. Gray was well to the front, and a number of pastel shade flannels, biscuit, and beige, were seen.

Contestants wearing flannel trousers in plain white, and gray, were small in number, but these were extremely popular with the men in the galleries.

Tweeds appear to be increasing in popularity very rapidly, but as these events were played during the hot season, this heavier fabric was not as much in evidence as we expect it to be during the cooler days of Fall and Winter. Tans, rich shades of brown, grays, and blue-grays were the prevailing shades. Only very subdued patterns such as herringbones and small tick patterns seemed to be acceptable.

Shetlands, in white, and sand, appeared to run second to tweeds, while linens and gabardines were few and far between.

There is a greatly increased interest in camel's hair knickers, in natural, tan, and brown shades.

Little or no change has taken place in the cut of knickers this season, and the only noticeable feature in styling was the use of two pleats on either side.

We will review the trend in sweaters and hose, shirts, neckwear, headwear, and shoes in next week's column.

The Cavalier

Indicted Striker Red Delegate

CHARLOTTE (N. C.) Oct. 13. (AP)—The National Textile Workers' Union bringing its southern conference to a close today elected a Gastonia cotton-mill striker as a delegate to the twelfth anniversary of the Red Revolution of Russia in Moscow, November 7, next.

Russell Knight, one of sixteen persons indicted on a charge of murder for the slaying of O. P. Aderholt, Gastonia Chief of Police, during strike disorders there, is the delegate.

FATHER AND SON VICTIMS
NEW YORK, Oct. 13. (AP)—John Serocco, 52 years of age, was killed and his son Alfred, 22, was wounded fatally tonight by gunmen who shot them in the back as they were talking in the doorway of the Lower East Side tenement house in which they lived.

AMAZING DEVELOPMENTS
IN OIL INDUSTRY SEEN

CAMBRIDGE (Mass.) Oct. 13. (AP)—A new romance of "black gold," the petroleum from the world's great oil wells, is about to begin.

That is the opinion of an eminent American chemist, Dr. James F. Norris, director of the research laboratory of organic chemistry of Massachusetts Institute of Technology.

Prof. Norris sees in recent chemical developments the production of substances, that laymen have not even dreamed of as associated with petroleum.

"When some of the chemicals which we have been burning up in gasoline are properly treated," he says, "we shall have an improved fuel giving more miles per gallon and with it substances that will make not only added wealth, but articles of use, comfort and even beauty."

"We do not yet know fully what petroleum is. We have a long list of the substances that exist in petroleum, but know little about their proportions, methods of extraction and uses. We know something of the high values they possess, and we are making the beginnings of their extraction."

"We know, for example, that antiseptic can be prepared from petroleum, and we have reason to believe that they may have none of the bad after effects of chloroform and ether."

"There are chemicals in oil that, when extracted, can be converted into the compounds used to make artificial leather not only more durable, but to keep it soft and pliable; and other compounds that will help to make a crystal clear glass, with virtually no danger of breaking; and still others to produce materials that resemble polished ebony."

Robert E. Lee
Day Observed

STRATFORD (Vt.) Oct. 13. (AP)—"National Stratford Day," inaugurating a movement to raise \$500,000 for the restoration of the home of Gen. Robert E. Lee, was observed here today with several hundred persons representing a majority of the seventeen States participating in the movement, in attendance.

Dr. Albert Bushnell Hart, famous historian of Harvard University, and United States Senators Albin W. Barkley of Kentucky and Harry B. Hawes of Missouri, delivered addresses from the steps of the ancestral home, built in 1738.

CITRUS SHIPMENTS HEAVY
ONTARIO, Oct. 13. (AP)—With its season not quite completed, the Up-land-Ontario district has shipped 3874 carloads of oranges, lemons and grapefruit.

MEXICO WINS HONOR IN
AIR TRANSPORTATION

MEXICO CITY, Oct. 13. (AP)—Mexico occupies second place in commercial air transportation in America, according to figures made public by the government, and fifth place among the nations of the world. The figures show that in September 134,653 kilometers were covered by commercial planes in Mexico. A figure surpassed in America only by the United States.

RICH MEXICAN ASSASSINATED
MEXICO CITY, Oct. 13. (AP)—Hilario Carrasco, wealthy estate manager, was shot to death in the Mexican Plaza of Texcoco, State of Mexico, according to a dispatch to Excelsior, which says the assassination was the outcome of a feud. Ignacio Espinosa, Carrasco's enemy, perhaps was fatally stabbed before Carrasco's death.

COURT FIGHT REPORTED
MEXICO CITY, Oct. 13. (AP)—Press dispatches from the city of Chihuahua say that the State Legislature has ousted the President and one other magistrate of the State Superior Court on a charge of disobeying orders of the Governor.

Mexican Given
Death Sentence

MEXICO CITY, Oct. 13. (AP)—Although the new penal code abolishing the death penalty has been printed in the official gazette, a jury in the Belen Criminal Court here sentenced Alvaro Fernandez Castillo to die by a firing squad for the murder in 1927 of Leandro Hernandez, head of a union of flour mill workers.

Publication of the penal code in the gazette has led to a debate as to whether it was effective automatically. The original plan was to make it effective December 15.

COURT FIGHT REPORTED
MEXICO CITY, Oct. 13. (AP)—Press dispatches from the city of Chihuahua say that the State Legislature has ousted the President and one other magistrate of the State Superior Court on a charge of disobeying orders of the Governor.

PLEA SENT OUT IN MILK STRIKE

Kansas City Voices Appeal
to Federal Farm Board

Survey by Economist Urged
to Determine Facts

Deputies to Guard Roads in
Fight Against Sabotage

KANSAS CITY, Oct. 13. (AP)—The Federal Farm Board tonight was asked to assist in bringing to an end Kansas City's milk strike with its accompanying sabotage, armed violence and threats of murder.

Producers who stopped the delivery of milk to pasteurizers here last Monday asked the Farm Board to send an expert economist to Kansas City to ascertain costs of pasteurizing milk, milk production and handling costs and to present them to the public.

Meanwhile, Sheriff Smalley of Jackson county announced that beginning tomorrow his deputies will patrol highways leading out of Kansas City in an effort to stop the dumping of milk from trucks en route here.

TELEGRAM SENT
After a meeting of the executive committee of the Milk Producers' Association, of the greater Kansas City territory, on Oct. 13, E. P. Mulligan, president of the organization, sent the following telegram to Chairman Alexander Legge of the Federal Farm Board at Washington:

"Milk dealers here have refused any recognition of the farmers' right to co-operative marketing. Milk Producers' Association of Greater Kansas City territory have refused delivery of milk. Request Farm Board to send expert economist to investigate and lay facts before public."

An emergency supply of milk obtained from distant points, has prevented any shortages during the first week of the strike. Members of the Consumers' League, an organization of women, recently charged that the supply is not being properly inspected and does not meet requirements specified in city ordinances, but this promptly was denied by city health department officials.

THREATS OF DEATH
For several days Kansas City police have guarded the unloading here of milk which has been shipped in from distant points to milk distributors. The action of the Sheriff was the first step taken to stop sabotage on the highways over which most of the milk must come to Kansas City by motor truck.

O. C. Murphy, city commissioner of inspection and sanitation, yesterday received threats of death. Trying squadrons of masked men have stopped trucks bringing milk into the city and dumped the fluid on the road. Mr. Murphy has called on all milk producers to refrain from any violence or sabotage during the strike and is determined to put a stop to such practices. The raids have resulted in the dumping of several thousand gallons of milk during the week of the strike, 1200 gallons having been poured out yesterday.

The producers decided to withhold milk from Kansas City distributors unless an increase of approximately 6 cents a gallon was made in the present rate.

Band of Ghouls Hunted in North

PORTLAND (Or.) Oct. 13. (AP)—While Multnomah county authorities today sought an answer to why the body of Mrs. Frances Milsted, former Oregon City (Or.) resident, had been removed from a grave in the Troutdale Cemetery, Umatilla county officials sought a band of ghouls who have raided two Indian burial grounds and removed beaded relics and ancient weapons.

Mrs. Milsted died in Oregon City March 10, 1922. Relatives could give authorities no reason why the grave should have been disturbed. They said Mrs. Milsted's body was not buried with jewels. Deputy sheriffs found footprints around the grave, but nothing further on which to base a search.

Revolutionary Hero Honored

BUFFALO (N. Y.) Oct. 13. (AP)—The unusual analogy of a Canadian regiment joining in a tribute to a Revolutionary War hero was presented here today when the Queen's Own Rifle of Toronto took part in memorial exercises for Gen. Cospatrick Pulaski, who on October 3, 1777, when he was only 20 years of age, was fatally wounded in an attack upon the British garrison at Savannah. It was a grand tribute, avowedly by the Polish people of Buffalo.

Murder Laid to Steeplejack

CHICAGO, Oct. 13. (AP)—John Preston, 32 years of age, painter and steeplejack, today was booked on a murder charge in connection with the slaying of Miss Agnes Johnston, 26, whose body was found in a clump of bushes a few hours after they had been in each other's company.

JAILED DOUKHOBORS END HUNGER STRIKE

VANCOUVER (B. C.) Oct. 13. (AP)—The 113 Doukhobors, prisoners in Oakalla jail, capitulated yesterday after a three-day hunger strike. Supt. J. H. McMullen of the provincial police, who arrived from Victoria to investigate the situation, reported the Doukhobors, men and women, are eating again. Famished after refusing food for three days, they have resumed their meals of vegetables and pasta, he said. The Doukhobors were imprisoned for parading in the nude.

Decision Soon

By a Times Staff Correspondent
SAN FRANCISCO, Oct. 13. (Exclusive)—For the first time in all the years that a bridge from San Francisco to Oakland or Alameda has been evolving from a nebulous idea into active steps toward consummation there is reason now for San Franciscans to believe something actually will be done about it.

In recent years, it is true, efforts have been made to bring the trans-bay span to position somewhere near realization. An impartial board of experts was assembled, made a thorough study of the bay and prospective bridge sites and gave the public recommendations for sites, the leading one of which is from Rincon Hill, in the industrial section to the Alameda mole, or approximately that location. It was the greatest single forward step taken in the quarter of a century a major span has been under discussion and a half century more of thoughts about such a thing.

DELAYS CONTINUE
But even with this report in hand, one delay after another has intervened to keep shoving the actually ever more into the future. At length the now-famous junket of supervisors to Washington was promoted, with results laughable were the bridge matter not such a serious item of concern.

Opposition of the War Department, engendered by the Navy Department, is a matter of history. It is based on the free movement of ships in the event of war. This objection still has to be overcome. It was in the effort to overcome it, the supervisory junket, on Washington was made only to be reduced to a laughing stock when the chairman of the committee dumped his colleagues overboard and proceeded to carry a personal junket in favor of a tube under the bay instead of a bridge over it. Meritorious as the scheme might be, and it has its proponents as well as opponents, the fact remained the committee was not sent to Washington to argue for a tube but argue for a bridge. Little wonder then the matter has been a sore spot to constructive-minded San Franciscans and East Bay residents.

PRESIDENT GETS BUSY
It has taken the President of the United States to get things moving. In his just fashion, Herbert Hoover went right to the heart of the situation by suggesting a committee to collect and submit pertinent data. He calmly ignored the years of red tape, political inertia and petty personalities which have gummed the wheels of progress and in collaboration with Gov. Young went right ahead and appointed that committee he suggested.

Only in the case of the joint committee, facts are the prime requisite. The President has no interest in ideas about construction, regardless of how faithful they may be. He wants to know what, how, why and where. Once that is known, "when" will be brought right forward into the picture. The President's commission decided the first thing to be done is to obtain soundings and borings of the bay floor. Unbelievable as it may seem, all the agitation, argument, appeal and pettifoggery of recent years have gone on without these data at hand.

TRAFFIC SURVEY
The President's commission also thinks of something which has not been brought into the foreground before, despite the millions upon millions of words that have tumbled forth about the transbay bridge. A complete traffic survey is to be made of the entire bay area so it will be known right down to the unit just exactly what the construction of the bridge will mean and what bearing it will have on general conditions. This traffic survey includes ferry transportation and other shipping on bay waters; aviation facilities and activities; and highway movement of traffic on the peninsula and all counties contiguous to the bay.

In other words, the President's commission will know more about the bridge and complementary factors in the next sixty to ninety days than San Franciscans have been able to learn from their duly elected municipal representatives in two decades or more. This bridge will entail the greatest engineering science this country ever has known and, perhaps, the world at large. Its benefits are more or less obvious. Briefly, it will do more to unify and solidify the trans-bay trading area concentrating on bay shores than anything else that could be done. All of California will ride the wave of its utility.

Apparently as remarked, the bay bridge is about to emerge, thankfully, from the warm air stage.

Cotton Pickers Shortage Slows Down Harvest

CALEXICO, Oct. 13. (AP)—A serious shortage of cotton pickers in the California end of the Imperial Valley had materially slowed down the picking and ginning in the first week of October.

The inability to secure sufficient Mexican laborers at this season is viewed with alarm by growers in the northern end of the valley, who are facing close competition with the industry across the border.

TRIO FACES TRIAL FOR MURDER OF EDITOR

JACKSONVILLE (Fla.) Oct. 13. (AP)—Three former city employees, Harvey Jackson, Forrest McElroy and George Marshall, face trial here on first-degree murder charges in connection with slaying of W. P. (Billy) Parker, editor of a weekly paper, the Blue Shirt, several weeks ago.

X hurls the challenge, your trade group accepts.

*X personifies the
powerful external forces that surround every
industry—and every individual
business—today!*

A few years ago electrical refrigeration was introduced to a receptive world. Ice sales slumped. Startled ice men banded together—launched an aggressive merchandising program—and built a bigger business!

Today, if you plan to build a house, the makers of fifty-seven varieties of wood substitutes—brick, tile, stone, celotex—seek you out. And, at the same time, the lumbermen are united in a national campaign to hold your preference!

On every hand you see this new activity—independent merchants organizing to offset the competition of the chain stores; coal dealers combining to meet the menace of oil heating; the silk and cotton industries joining forces in opposition to rayon!

Not Even the Big Can Stand Alone . . . Against X

New inventions . . . changing public taste . . . revolutionized distribution—these are typical of the external forces, personified by X, that challenge every industry—and every business—today. So complex is this world of modern business—so many and so powerful these threatening X forces—that even the biggest business men cannot stand against them alone!

Yet co-operating with each other, and with the Department of Commerce, trade associations and cham-

bers of commerce are saving American industry—by action alone—\$500,000,000 a year! Spending \$35,000,000 yearly for industrial research and \$10,000,000 annually for advertising—they are reducing industrial accidents, saving public safety, stabilizing and establishing better collection and insurance departments.

Your trade group and chambers of commerce are indeed meeting the challenge of X—and at the time building a more solid basis for your business and all business.

A Monthly Analysis of the Forces in Modern Business

Published monthly by the United States Chamber of Commerce, Washington, Nation's Business authoritative interpreter for the operative movement. More than 300,000 alert business men upon it for the facts about what is happening in—and is to be—information which Nations Business intelligently analyzes in their every-day activities! Its value to you is limited only by the use you make of it.

You can get the Nations Business at the normal rate . . . 25 cents; or you may subscribe direct to the publisher . . . \$7.50 for three years.

NATION CATERS TO ITS TUMMY

Secretary Davis Gives Idea of
Americans' Menu

NEW YORK, Oct. 13. (AP)—Secretary of Labor James I. Davis told a radio audience over a nation-wide hook-up tonight that the average annual food consumption of 800 typical American working families with incomes of from \$900 to \$2500 per year, included 488 pounds of meat, 64 dozen eggs, 236 pounds of sugar, 777 pounds of flour, meal, bread and rolls, and other articles in proportion.

These truths show, Mr. Davis continued, "why aliens by the million are clamoring to enter the United States. They want the American standard of living."

NEW PLANE LINE FOR SOUTHWEST

Los Angeles-to-Dallas Service
Starts in Two Weeks

DALLAS (Tex.) Oct. 13. (AP)—opening of an air line between Los Angeles and Dallas by way of El Paso within two weeks, as the first leg in a Los Angeles-New York aerial route, was promised by John Borden Miller, vice-president of the Great Southern Airways, who arrived here today for a series of conferences here and in Fort Worth.

First of the line's planes, he said, will be delivered within two weeks, and others will follow until four are in operation.

Cut from Country by
Versailles Treaty
surprise Greater Part of
Two Provinces
DAM, Oct. 13. (AP)—With the
argument over the exact
reparation and the exact
line of demarcation between
the war, Germany's thought
concentrated on East Prussia
and Poland. The line of
demarcation between the two
countries was a German line
of German East - Prussia.
The rest of the Reich
was a wide strip cut off
from the rest of the country
to give Poland her outlet to
the sea. The greater part
of the provinces of West
and Pomerania, the population
of 1919, the population of
1935 was 45 per cent Polish.
They are regarded by many
as among the greatest
disasters of the German East
and ethnically an
important part of Germany.

POLITICAL ISSUE
The issue of being headed by time
into history, the
question of the corridor
has been a growing source
of friction throughout the Reich.
The German East - Prussia
from the Province of Pomerania
and the Province of Pomerania
to the very edge
of the Brandenburg Gate, the
German East - Prussia, are becoming daily
more and more painful to many
of the German people.

PENNSYLVANIA READY FOR MAIDEN VOYAGE
NEW YORK, Oct. 13. (AP)—The new \$2,775-ton Panama-Pacific liner Pennsylvania, described by the builders as the largest passenger vessel ever constructed in an American shipyard, arrived here today from Newport News, Va., and will start her maiden voyage in the New York-San Francisco service, the 19th inst.

LIQUOR PENALTY FIXED
HARTFORD, Oct. 13. (AP)—The Kings County Board of Supervisors passed an ordinance this month which sets a scale of punishment for convictions on intoxication charges outside of incorporated towns.

PIED PIPER WANTED
PACIFIC GROVE, Oct. 13. (AP)—Wanted, one Pied Piper with a darned shrill flute to entice an unestimated number of cat-sized rats from the vicinity of Yreast and Lighthouse avenues. When workmen rased a building on this corner rate "as big as tomorrow" scurried out looking for new homes. One man reported seeing eighteen rodents striking in the moonlight one night. Officials haven't decided what to do about it.

WIRELESS "CENTRAL" TO AID NAVY TESTS

WASHINGTON, Oct. 13. (AP)—The office of United States naval communications has announced the establishment of a "radio central" through which the Navy will make twice-a-week tests of a network of stations operated by naval reservists, all amateurs. This will make available a reserve radio service for volunteer work in disasters. During the recent hurricane in the Gulf States, radio stations owned and operated by members of the naval communications reserve, were of material aid to the United States Weather Bureau and the press during lapses in commercial communication facilities. The radio central NKP will check Monday and Thursday nights from 7:30 to 10 p.m. with master control stations in the various naval districts.

PHEASANT EGGS SHIPPED
SACRAMENTO, Oct. 13. (AP)—A case containing 200 Chinese ring-necked pheasant eggs was shipped from California recently to the Fish and Game Commission of Hawaii.

GRAND JURORS MAY FACE QUIZ

San Francisco Squabble to Be Aired in Court Today

Foreman Already Has Asked Dismissal of Body

Other Members Accuse Him of Playing Politics

SAN FRANCISCO, Oct. 13. (Exclusive)—San Francisco county's grand-jury imbroglio is scheduled to be threshed out before Presiding Superior Judge Conlan tomorrow or Tuesday with possibilities that he will grant the request of seventeen of its nineteen members that a thorough investigation be made of recent happenings within the grand-jury room and those outside having a bearing.

Leslie J. Hopkins, foreman of the body, is on record with a plea that Judge Conlan dismiss the group. Hopkins contends political considerations have so undermined the efficiency of the grand jury its usefulness is ended. Its sole aim, he says, is to apply liberal costs of witness to any and all controversial matters before it in which influence can be brought to bear.

The split in the grand jury, said to have been developing for some time, came to a climax after the body failed to vote an indictment of John H. Thiel, former City Treasurer, who resigned under fire and faces civil action to recover interest assertedly lost because of his inefficient handling of city and county funds.

JUDGE MARRIES COUPLE AND ATTACK CASE ENDS

MENLO PARK, Oct. 13. (Exclusive)—Municipal Judge Cook is not one to argue over a woman's right to change her mind. Mrs. Rose Falyer had Don Coe taken into court for assault and battery, but when she decided to marry Coe instead, Judge Cook obligingly tied the knot and dismissed the battery charge.

WHAT YOU SEE

Nose Dive

WHAT YOU DON'T SEE

WHAT You See: A monoplane shooting along in the sky. Suddenly the pilot throttles the motor, the plane falters in its flight, then pitches toward the earth in a nose dive. You hold your breath. The engine roars and the plane straightens itself out, resumes its flight.

What You Don't See: The skilled and experienced mechanics grooming that plane for the air, many times, as occasion demands, using Nicholson Files.

There are many jobs around a plane, motor boat or automobile that only a file can do. Beyond any question the best files for these filing jobs are those bearing the Nicholson Brand.

In shapes and sizes for every need. At your hardware dealer's.

TEMPO TENDON DEVAB HOOTED"

AND GRAPEFRUIT REACHES YOUR TABLE
FRESH FROM DISTANT SUNNY LANDS

CRYPTIC words—a Postal telegram in code meaningless to all except the grapefruit shipper and the buyer. And yet, in the use of those four code words, lie the reasons why grapefruit is so good and so broadly distributed in regions foreign to its growth.

Postal Telegraph is the vital nerve which completes the deal between the grower with fruit to sell and the store with customers to supply. Such messages bring fresh fruit in prime condition.

Quotations, sales orders, shipping directions—speeded over the enlarged Postal Telegraph—make the solution of high inventories, of slow turnovers whatever the kind of goods.

All business is turning to this service. And for these reasons: Speed, Accuracy, Reliability. A written record of the delivered message. Privacy for sender. Instant attention of recipient. World-wide wire connections.

Postal Telegraph, through affiliations in the International System, goes round the world: to Europe, Asia, the Orient over Commercial Cables; to the West Indies, Central and South America over All America Cables; even to ships at sea through Mackay Radio.

FRESH GRAPEFRUIT—how good it is. Postal telegrams have brought it thus fresh to your table—telegrams from local merchant to wholesaler, from wholesaler to grower. Business everywhere is using the Postal Telegraph to insure speed and accuracy in all transactions.

-2228-2229-2230-2231-2232-2233-2234-2235-2236-2237-2238-2239-2240-2241-2242-2243-2244-2245-2246-2247-2248-2249-2250-2251-2252-2253-2254-2255-2256-2257-2258-2259-2260-2261-2262-2263-2264-2265-2266-2267-2268-2269-2270-2271-2272-2273-2274-2275-2276-2277-2278-2279-2280-2281-2282-2283-2284-2285-2286-2287-2288-2289-2290-2291-2292-2293-2294-2295-2296-2297-2298-2299-2300-2301-2302-2303-2304-2305-2306-2307-2308-2309-2310-2311-2312-2313-2314-2315-2316-2317-2318-2319-2320-2321-2322-2323-2324-2325-2326-2327-2328-2329-2330-2331-2332-2333-2334-2335-2336-2337-2338-2339-2340-2341-2342-2343-2344-2345-2346-2347-2348-2349-2350-2351-2352-2353-2354-2355-2356-2357-2358-2359-2360-2361-2362-2363-2364-2365-2366-2367-2368-2369-2370-2371-2372-2373-2374-2375-2376-2377-2378-2379-2380-2381-2382-2383-2384-2385-2386-2387-2388-2389-2390-2391-2392-2393-2394-2395-2396-2397-2398-2399-2400-2401-2402-2403-2404-2405-2406-2407-2408-2409-2410-2411-2412-2413-2414-2415-2416-2417-2418-2419-2420-2421-2422-2423-2424-2425-2426-2427-2428-2429-2430-2431-2432-2433-2434-2435-2436-2437-2438-2439-2440-2441-2442-2443-2444-2445-2446-2447-2448-2449-2450-2451-2452-2453-2454-2455-2456-2457-2458-2459-2460-2461-2462-2463-2464-2465-2466-2467-2468-2469-2470-2471-2472-2473-2474-2475-2476-2477-2478-2479-2480-2481-2482-2483-2484-2485-2486-2487-2488-2489-2490-2491-2492-2493-2494-2495-2496-2497-2498-2499-2500-2501-2502-2503-2504-2505-2506-2507-2508-2509-2510-2511-2512-2513-2514-2515-2516-2517-2518-2519-2520-2521-2522-2523-2524-2525-2526-2527-2528-2529-2530

THE BEASTS OF TARZAN

By Edgar Rice Burroughs

GASOLINE ALLEY

Taking it Up With Headquarters

The wily Russian recalled the canoe his party had left and now in one of them he glided swiftly down stream, intent upon reaching the island of Tarzan. At sight of his enemy the broad scar upon the ape-man's brow burned deeper, and there rose to his lips the hideous challenge of the bull-ape. Rokoff shuddered at the terrible cry.

Next he saw Tarzan run quickly to the river's edge. An instant later the ape-man dived fearfully into the tropical river's forbidding waters. With steady, powerful strokes he forced out into the stream toward the drifting canoe. Rokoff's terror-wide eyes saw the living death coming closer and struck out madly with his paddles in an effort to speed up the unwieldy craft.

And from the opposite bank a sinister ripple, unseen by either man, moved steadily toward the half-naked swimmer. Tarzan had reached the very edge of the craft at last. One hand up-swept, grasped its side. Then a sudden convulsion in the water behind the swimmer caught his attention. Rokoff saw the ripple and knew what caused it. And Tarzan felt mighty jaws close upon his right leg.

He tried to raise himself into the boat. But Rokoff, with a swift blow, struck Tarzan across the head with his heavy paddle. The ape-man's fingers slipped from their hold. There was a short struggle at the surface, a little eddy, and then only a burst of bubbles on the swirling current marked the spot where Tarzan of the Apes, Lord of the Jungle, disappeared from sight.

EXPORTS OF OIL SLUMP SHARPLY

September Shipments Set at 8,376,758 Barrels
More Than 3,000,000 Decline Under August Shown
Figures for Nine Months of 1929 Well Ahead

Bulk petroleum exports from Los Angeles Harbor during September declined sharply from the combined shipments of August, the customs figures show. September exports were 8,376,758 barrels, against 11,411,243 in August, a difference of more than 3,000,000 barrels.

The combined shipments of petroleum from this port for the first nine months of the year have maintained a high level, the figures showing 83,728,104 barrels, or at the rate of more than 9,000,000 barrels per month.

During September, 4,627,815 barrels of petroleum products went to the Pacific domestic trade, 2,048,833 barrels went to the Pacific foreign trade, 2,337,107 barrels were taken by the Atlantic domestic trade, and 1,344,888 barrels were consigned to the Atlantic foreign trade. Only part of the oil used on this Coast goes in the export totals.

The shipments consisted of 2,349,461 barrels of crude, 2,473,288 barrels of fuel oil, 2,888,463 barrels of kerosene, 184,788 barrels of benzene, 18,176 barrels of distillate, 52,811 barrels of Diesel oil, and 1877 barrels of lubricating oil. While crude oil and gasoline were not far apart in total, gasoline stood in first place because of the vacation demand for motor fuel.

NINE NEW WELLS ON KERN MAP

Two on Front Field and Three in Maricopa Area Among Maricopa

BAKERSFIELD, Oct. 13. (AP)—Nine new wells have just been started in the Kern county fields. Two in the Kern front field are Standard Oil Company's Bonny No. 1, on Sec. 1, 28-27, and Chandler-Campfield No. 1, on Sec. 28, on Sec. 28-27.

Three new wells to be drilled in the Maricopa area of the Midway field are Standard Oil Company's Bonny No. 1, on Sec. 1, 28-27, North American Consolidated Standard's No. 3, on Sec. 4, 11-27, and Doyle Petroleum Corporation's No. 1, on Sec. 8.

Two new wells for the Poso Creek area are Union Oil Company's No. 1, on Sec. 28, 27-28, and the Vista Hills No. 1, on Sec. 18, on Sec. 5, 32-24.

Fred M. Sayre is starting an oil well known as No. 1, on Sec. 28-27.

Progress Slow in Drilling of Big Lake Well

BIG LAKE (Tex.) Oct. 13. (AP)—Slow progress is being made by the Big Lake Oil Company in drilling four wells to the horizon in the same locality as that of its deep producer. The cost of drilling and completing these four deep tests is expected to range between \$150,000 and \$175,000 each, while the cost of drilling the deep discovery well was \$140,000. The latter figure does not include the cost of the wire lines used, which were provided by the company.

The deep discovery well required about 670 working days to drill to the horizon. The labor cost was estimated at \$51,000, or \$76 a foot, and the other expenses totaled \$118,000 a foot for the complete well, according to statistics compiled by Waldo Williams, who is geologist for the company.

LOFTY BLUE LEAD HOLDINGS ACQUIRE

The Mines Operating Corporation has acquired the holdings of the Lofty Blue Lead Mines Company in Sierra county and will operate the extensive gravel deposits owned by the latter on a large scale. The transfer includes water rights and other storage rights in Bullard Dam. Robert L. Hanley is general manager of the company and a group of Los Angeles oil men and engineers are financing operation.

EXPORTS OF OIL SLUMP SHARPLY

September Shipments Set at 3,776,758 Barrels
Not More Than 3,000,000 Decline Under August Shown

Export for Nine Months of 1928 Well Ahead

Oil exports from Los Angeles during September declined sharply from the combined exports of August, the comparison shows 3,776,758 barrels, against 4,076,758 barrels, a difference of more than 300,000 barrels.

The combined shipments of petroleum from this port for the first nine months of the year have amounted to a high level, the figures showing 34,000,000 barrels, or at the rate of more than 3,000,000 barrels a month.

During September, 3,776,758 barrels of petroleum products were shipped from the Pacific coast to foreign ports, according to the figures of the Bureau of Commerce, U. S. Department of Commerce. This compares with 4,076,758 barrels of petroleum products shipped from the Pacific coast to foreign ports during August, the figures showing a decline of more than 300,000 barrels.

NINE NEW WELLS ON KERN MAP

Two on Front Field and Three in Maricopa Area Among Number

MEADOWS (Ariz.) Oct. 13. (Exclusive)—Nine new wells have just been started in the Kern county oil field. Two in the Kern front field and three in the Maricopa area among number.

Progress Slow in Drilling of Big Lake Wells

LAKE (Tex.) Oct. 13. (Exclusive)—Progress is being made in the drilling of the Big Lake oil wells in the same locality as the one in the same locality.

ANODE SHIPPING DUE SOON

DOUGLAS (Ariz.) Oct. 13. (Exclusive)—In about one month California and Arizona will be shipping anode copper to the new refinery at El Paso, a plant understood to be nearly completed.

UNITED STATES BLUE LEAD HOLDINGS ACQUIRED

The United States Blue Lead Holdings Corporation has acquired the holdings of the United States Blue Lead Mining Company.

GAS LINE TO ENTER NEW TEXAS AREA

Fifteen-Mile Project of Dallas Concern Planned for McCamey Section

MCCAMEY (Tex.) Oct. 13. (Exclusive)—The Southern Union Gas Company of Dallas will lay a fifteen-mile gas-pipe line from the Taylor-Link pool in Pecos county to McCamey. The company has obtained a twenty-five-year franchise for operating a gas-distributing system here. It is negotiating for contracts to supply natural gas to the McCamey refinery of the Humble Oil and Refining Company, and the Gilman plant of the Pecos Valley Power and Light Company. The combined daily demand of these two industrial units is estimated at 6,000,000 cubic feet of gas, and the latter product would be used for fuel and crude for fuel.

Gold Strike of Treasure Vault Holds Interest

KINGMAN (Ariz.) Oct. 13. (Exclusive)—The gold strike at the Pilgrimage property of the Treasure Vault Mining Company, continues to be the center of interest in Mojave county, where this new gold district is attracting the attention of mining men from all over the country. The development of the Pilgrimage property since the first discovery of the rich ore in its upper levels has been in a most satisfactory manner and, as depth is attained both the width of the huge vein and the values have steadily increased. Recent sampling of the 230 and 350-foot levels showed almost three feet of vein matter on the hanging-wall side, assaying over \$1500 per ton, and lying alongside this picture rock on the 350-foot level, is eight feet of solid ore that runs over \$1400 per ton. This same vein is said to be practically double in width from the upper levels and drifting is now under way, opening up tonnage which will be available for a long time which will shortly be constructed.

Operations in Union Avenue Area Revives

BAKERSFIELD (Cal.) Oct. 13. (Exclusive)—The Union-avenue field, two miles south of Bakersfield, will soon be the scene of revived activity, according to officials of the Western Gulf Oil Company.

OHIO'S FAILURE DISAPPOINTING

Project at Kettleman Hills Dampens Hopes
Success Would Have Added to Production Area

Failure of the Ohio Oil Company's Smith No. 1 on the south dome at Kettleman Hills to come in as a good producer was perhaps the biggest disappointment of the week in oil circles, as its successful completion would have proved up considerable acreage.

MINE GROUP PRODUCTION SETS MARK

Gold and Silver Values in September \$131,000 at Tonopah Properties

TONOPAH (Nev.) Oct. 13. (Exclusive)—Production of the Tonopah Extension and Tonopah Mining companies in September totaled 166,680 ounces of silver-gold bullion, valued at \$131,000. The yield was the heaviest recorded for any month this year, with the ore coming largely from the Tonopah Mining, Belmont and Extension properties. Production from the Divide district has slumped.

UNIVERSAL OIL TELLS PROFITS

Net in Nine Months Reported at \$1,466,009

Figures for Third Quarter of Year \$421,916

Management of Company Now Under Richfield

Net income of the Universal Consolidated Oil Company for nine months, ended September 30, last, totaled \$1,466,009, after depreciation, depletion, intangible drilling expense and provision for Federal income tax, according to the report to stockholders of James A. Talbot, president of Universal. Net income for three months ended September 30, last, after the same charges, amounted to \$421,916.

SUGARMAN ORE STRIKE IMPORTANT

Accidental Discovery in Sonora Mine of Company Held Richest Yet Made

An important ore discovery has been made in the Sugarmen mine of the Sugarmen Mines, Inc., in the Mother Lode District near Sonora, according to reports received at the Los Angeles offices of the company from Supp. Arthur Delaney.

OHIO WELLS Real Test for Buena Vista Lake Area

TAFT (Cal.) Oct. 13. (Exclusive)—The Ohio Oil Company's Pyramid No. 1 well, located on Sec. 20, 22-25 in the Buena Vista Lake district, is becoming a real test for that area. The hole is now more than 5000 feet with the bit in shale formation. The eighteen and five-eighths-inch casing is set at 1701 feet, and plans are being made to drill deeper.

Old McNamara Mine Passes to New Interests

TONOPAH (Nev.) Oct. 13. (Exclusive)—The old McNamara silver-lead mine, situated on the southwest slope of Palmetto Mountain, has been taken under bond and lease by a group of Southern California firms headed by E. J. Brier of Santa Barbara. The bond runs for eighteen months, with a substantial first payment said to have been made. The property embraces five claims, a mill site and water rights developing around 90,000 gallons per day.

Two McKittrick Wells Starting

McKITTRICK (Cal.) Oct. 13. (Exclusive)—Two new rigs are up in the McKittrick field and new wells will be drilled soon. H. L. Whiston is the latest operator to invade the district, having built derrick on Sec. 30, 30-22 for his Wisconsin No. 1 well.

TIME FIXED FOR BLOW-IN OF SMELTER

Plant at Humboldt Due to Start Operations in December, Next

PRESCOTT (Ariz.) Oct. 13. (Exclusive)—General Manager George D. French of the Sheldon Mining Company, has announced that the company's smelter at Humboldt will blow in during December, under direct charge of P. F. Butler, formerly with the Copper Queen works at Douglas.

The reverberatory furnace will handle about 200 tons of concentrates a day, of which possibly fifty tons will come from the Sheldon mill at Walker, on upper Lyons Creek.

BARNSDALL OIL PLANS WILDCAT

Project Will be First North of Elwood Field

Sites Believed Near Center of Government Lease

Standard Picks Location for New Maricopa Well

MARICOPA (Ariz.) Oct. 13. (Exclusive)—The Barnsdall Oil Company's first wildcat north of the Elwood field, in the production end of the oil business, is about to be taken on a 100-acre government prospecting permit at Maricopa Flat—a property it obtained about eight months ago. It has selected the site for its No. 1 well on Sec. 17, 11-23, 300 feet south and 200 feet west from the northeast corner of the southeast quarter of the northeast quarter of the section.

MEASURE YOURSELF!

An unusual General Agency opportunity for an unusual man is open with an energetic and established Life Insurance institution—an Old Line Legal Reserve Company operating largely in the far and middle west.

Consider these qualifications carefully and apply them to yourself:

1. Experience—Practical life experience; a successful personal production record; and some organization experience.
2. Ability—Executive ability in handling men and showing them how to work.
3. Record—A solid background of past performance that merits attention and speaks for itself.

To the man capable of measuring up to all of these requirements an excellent connection is available. All interviews granted will be made with the President. Address inquiries stating qualification to NAX, Box 157, Los Angeles Times.

Members of our Organization know of this advertisement.

Community Water Service System

Growth and Stability

EARNINGS of water companies are probably more stable than those of any other industry. Growth of population and expansion of industrial activity results in a substantial annual increase in the use of water, and water service is little affected by general business conditions.

Stability plus the necessity of the service are reflected in the age and permanence of water company properties. The oldest subsidiary of Community Water Service Company has been in successful operation for 76 years, while practically

Last Minute News from Petroleum Fields and Marts of Trade**SURPRISE IN OIL
HUNT FORECAST**

Strike May Reward Efforts
Near Palisades

Several Wildcats Continue
to Get Showings

Status of Various Projects
Briefly Summed Up

Persistent operators may yet spring a surprise in one of several wildcat wells drilling in search of production within a short distance of the Palisades field, three miles west of Santa Barbara, where there was considerable field activity early in the summer.

Although the best they could do was to develop two or three small pumps in the Palisades field, scattered tests continue to pick up oil showings at fairly shallow depths, which apparently affords encouragement to continue.

In the low No. 1 of D. A. Hargrave, the eastern output test on the mesa west of Santa Barbara, 100 feet of oil sand is reported to have been cored between 1800 and 2000 feet. Bottom of the hole is at 2800 feet and occasionally streaks of oil sand have been encountered. This test is one-half mile east of the Palisades field, where the Olympic Oil and Refining Company's Lomas No. 1 discovery well came in three months ago and which now is a sporadic producer.

Another test known as Caldwell No. 1 of the Alameda Oil Company, on the Palisades field, recently drilled through four feet of sand with oil showings. Bottom of the hole is below 4100 feet. It is the deepest that has been drilled in that immediate vicinity.

Due west of the Palisades field the Lincoln Drilling Company's Mid-cliff No. 1 has been suspended for nearly two weeks with bottom at 2400 feet. It failed to encounter any showings and indications are that it will remain suspended until further developments justify additional drilling.

matter of commercial value. The specimens are from San Bernardino county, California.

A: Better service can be given to correspondents if not over five samples are submitted for tests at one time, and each sample to contain but one variety of ore or mineral. There is no necessity of offering big "chunks." Your sample No. 1 is ferruginous quartz. No. 2 (two samples) carries a mixture of quartz, feldspar, yellow-clay quartz and iron oxides. No. 3 is ferruginous quartz containing microscopic traces of molybdenite and microscopical mica. No. 4 is Albite (soda feldspar) showing crystals of black tourmaline. No. 5 is of four different samples of quartz varieties carrying iron oxides, manganese and mica. No. 6 is ferruginous quartz with one of the samples showing traces of tourmaline, garnet and pyrite.

Tippet in the suit contended that if the State had any interest in the bonus, it should collect it from the oil company. The court apparently did not pass on the question as to who should pay the State the bonus, but merely that the State had a half-interest in the bonus and that either the oil company or the land owner or both were responsible for the State's half-interest.

There are approximately 1,600,000 acres of mineral land in Texas, purchased from the State, upon which a bonus has been paid, or upon which more than 10 cents per acre has been paid for rentals.

Oil Expert Urges Cut in Output
Says Curtailment Only Chances for Industry to Avert Disaster.
Working to a group of Southern California independent oil operators, J. E. Pogue, a consulting engineer and oil economist from New York, declared that the oil industry now is on a knife edge and that unless Texas and Oklahoma produce less oil for export, the industry will be wrecked. Mr. Pogue said that the present situation of the oil industry is a result of the fact that Texas and Oklahoma are producing too much oil for the domestic market. He stated that the oil industry must cut its production to a level that will allow it to meet the demand of the domestic market. He urged that the oil industry should be organized to control its production and to prevent the situation from becoming worse.

Valere County Oil Prospectors Get Busy Again
Prospecting in Valere county is active and drilling is being done in a number of places. The latest discovery is in the lower Duran, to the well of the Duran, where an old hole was reamed, and from there the eastern foothills of the Duran.

United Eastern's Claim Against Tom Reed Pared from \$70,000 to \$20,000
OATMAN (Ariz.) Oct. 13. (Exclusive)—In a suit of the United Eastern Mining Company against the Tom Reed Mining Company, a Mohave county jury has given a verdict of \$20,000 of the \$70,000 asked, for asserted loss of c. the Big Jim vein of the plaintiff. Defense was that the ore came from a side vein. The case had been pending for some time. A big pump is being lowered to a station cut on the 800-foot level of the Tom Reed shaft. Operation of the pump is expected to uncover the vein. A faulting problem will need to be solved. The American ground has five veins of its own with showings of good ore at two points. The State Company of Lone Basin, represented by T. C. Slater and C. O. Walcott of that city, has taken over the O.K. D.V. and San Diego groups of claims in the United Pass section. Machinery and camp equipment are being installed.

JURY CUTS DAMAGE IN MINE SUIT
United Eastern's Claim Against Tom Reed Pared from \$70,000 to \$20,000

SYNTHETIC MARBLE IN PROSPECT
Royston (Nev.) Turquoise to be Base for Making of Imitation Product
TONOPAH (Nev.) Oct. 13. (Exclusive)—The Royston Turquoise Mines Company announces that arrangements are being completed for heavy production of synthetic marble, impregnated with low-grade turquoise. The corporation is stated by President Bryce H. Sewell to have obtained permission from the Nevada State Board of Mines to produce synthetic marble. The Nevada Lead Company has acquired the Ida May mine, near Caliente, and announced a campaign of aggressive developments. New work includes driving two cross-cut tunnels to open the extension of the main ore bodies at greater depth. The Ida May has been a steady producer several years, and is credited with containing a substantial tonnage of silver, lead, copper ore. The Nevada Lead Company has worked mines in the Pioche field for the last eight years.

VENEZUELA OIL OUTLOOK CITED
Visiting Standard Executive Tells of Vast Supplies
Exploitation Seen as Aid to Conservation Program
New Schedule Announced on United Kingdom Run
BY WALDO DRAKE
America's petroleum supply, particularly in California areas, can best be conserved for the distant future by exploitation of the vast fields now being developed by American companies in Venezuela, in the opinion of Harry C. Reider, Standard Oil field executive, who yesterday returned from Maracaibo aboard the Dollar around-the-world liner.

Mr. Reider, after three years' work in the Venezuela field, says he is convinced that the fields in the vicinity of Lake Maracaibo, held by American companies on fifty-year leases have almost limitless production possibilities. "Conservation of California's petroleum fields is the very thing that will insure development of America's sea trade on the Pacific coast," he said. "The factor, both from an economic standpoint and in the strengthening of the national defense, is that the first-line companies are showing good foresight in exploiting the Venezuela fields; which, by the way, are far from being depleted. An average of only 200,000 barrels a day is being exported from the Maracaibo district, while this production could be increased to approximately 1,500,000 barrels daily if necessary."

Mr. Reider, formerly a field superintendent in the California petroleum field, will spend three months in Southern California before returning to Venezuela. He was accompanied on his trip here by Harry C. Reider, Jr., son of the Standard Oil executive, who is to make machinery purchases for a Maracaibo supply concern.

DONALDSON FLEET WILL BE ENLARGED
Donaldson-Pacific Line's United Kingdom-Pacific service will be increased to ten-day frequency from the present fortnightly schedule by addition of the full-refrigerator steamers Corinella and Corcoran, announced yesterday by Charles Glenn Donaldson, managing director, following his survey of the local port. The Donaldson-Pacific fleet is composed of six vessels; the two additional ships to be added early in 1930.

Mr. Donaldson was conducted on his tour of the port by R. A. Ingalls, district manager for the Ingalls, Guthrie & Co. Coast agent for the Donaldson-Pacific Line. He expressed his gratification over the Pacific coast reception of the line, established two years ago with monthly sailings, with cargo and passenger service. He will go to San Francisco today for conferences with company representatives, sailing for London on Thursday aboard the Canadian Pacific liner Empress of France.

Completing her nineteenth successive circuit of the globe, the Dollar around-the-world liner, Standard Oil's fastest ship, arrived at the port after having traveled approximately 600,000 miles of seawater under the Dollar house flag. The ship is today on her way to the Orient on her twentieth and last world tour, on completion of which she will be transferred to the Dollar house flag.

Twelve hundred tons of cargo and forty passengers arrived yesterday on the President Monroe, Standard Oil's fastest ship, which is making a direct service being run in world trade by the President-Monroe, now the Panama-Pacific.

Three hundred tons of cargo and forty passengers arrived yesterday on the President Monroe, Standard Oil's fastest ship, which is making a direct service being run in world trade by the President-Monroe, now the Panama-Pacific.

News of Ships and Sailings at Pacific Ports
SAN FRANCISCO, Oct. 13. (AP)—The United States Coast Guard cutter, USCGC Albatross, was reported to have arrived at San Francisco from Los Angeles. The cutter was on a patrol mission and was expected to arrive at San Francisco today. The cutter was commanded by Lieutenant Commander J. H. Smith. The cutter was accompanied by a crew of 40 men. The cutter was expected to arrive at San Francisco today.

OLD TWIN GOLD BEING REVIVED
SACRAMENTO, Oct. 13. (Exclusive)—The vigorous development of the old Twin gold property near Camptown, about twenty miles from Marysville, has been launched by F. P. Lorenz of Los Angeles, recent purchaser of the mine from Leonard Potts of Indian Valley. Installation of a large gas engine power plant and compressor has been completed, driving a large pump that has begun to the lower extension of the ore body, and an excellent camp has been established. The Pioneer Gold Mines Company, which owns the property, has been organized. The management states that the mine vein at a depth of 175 feet carries a shoot of rich gold ore, with the ore body about 100 feet wide. Tumbler has been found in the property and may become one of its chief assets.

Frank W. Ball, owner of the noted Sarris gold property at Masonic, asserts that the mine and mill have passed to control by Los Angeles investors, who are forming a company to work the old producer. Mr. Ball says an excellent field of mill ore has been uncovered in the southerly section of the property, and that the mine apparently is on the eve of an era of profitable production.

Title to the historic Gwin gold mine near Shepherdsburg, in California county, has passed to the Gwin Development Company, which is reported to be composed of New York, Boston and California capitalists. It is reported that the corporation plans to spend approximately \$1,000,000 on rehabilitation of the old producer, including the sinking of a central shaft to a vertical depth of 4000 feet. The Gwin property ranks among the oldest gold mines in California, long being noted for its yield of rich ores.

"WESTERN" LIBRARY WANTED
SAN FRANCISCO, Oct. 13. (Exclusive)—The League of Western Writers, which meets in convention at the Hotel Hamilton here Wednesday, is expected to adopt a resolution for the establishment of a library on the Pacific Coast to contain the works of western authors and those which have a western setting.

WHAT'S DOING

Woman's City Club luncheon meeting, clubhouse, 11 a.m. and meeting, Majestic Theater, 1 p.m. Ivan Kelen will speak.

Alpha Sigma Phi Alumni Club luncheon, University Club, noon.

California Art Club, Barnard Park, 8 p.m.

Los Angeles Museum exhibit, Exposition Park, 10 a.m. to 4:30 p.m.

Southwest Museum exhibit, Highland Park, afternoon.

Free permanent California exhibit, State Exposition Building, Exposition Park, 10 a.m. to 4:30 p.m.

Motion Pictures

For Criterion, 643 South Grand Avenue—"Great Gatsby."

Million Dollar Broadway at Third—"The Great Murder Case."

Mayan, Eleventh and Hill—"Marlene."

Crescent's Chinese, 6925 Hollywood Boulevard—"Cock-Eyed World."

For Carthy Circle, Whitire at Carthy Circle—"They Had to See Paris."

Low's State, Seventh and Broadway—"Her Private Life."

Paramount, Sixth and Hill—"Why Bring That Up?"

For Grauman's Egyptian, 6708 Hollywood Boulevard—"Imagine My Remorse."

Tower, Eighth and Broadway—"The Argyle Case."

United Artists, Broadway near Ninth—"Dance of Life."

Warner Brothers Downtown, Serv-

ice, 127 South Broadway—"Dark."

Orange Grove, Grand and Seventh—"Dark."

President, 744 South Broadway—"Shavings."

Hollywood Music Box, 6126 Hollywood Boulevard—"Harry Carroll's Rarities."

Burbank, Sixth and Main—"Burlap."

Follies, Fourth and Main—"Burlap."

Orpheum, Ninth and Broadway—"Buddy Rogers."

WINDOW SHADES RECONDITIONED

THE BLIND MAN: Here's a money-saving service for you. If your shades are soiled, torn, or cracked, to make them as good as new shades from whatever their present condition is. It's remarkably inexpensive and usually economical. Your shades are still good. All that will need attention are your shades. Please us to call for your old shades, and you may have them all back the next day completely reconditioned. Best's that for service! FREE: Send for these:

DEATH REVEALS HIDDEN RICHES

Small Fortune discovered in Search of Home of Oetogenarian

NEW YORK, Oct. 13. (Exclusive)—Mrs. Pauline Popplis, 80 years of age, who kept her own counsel about her life and withheld information from her neighbors on how she had accumulated the small fortune she was known to possess, was found dead today of natural causes in her home in Williamsburgh.

Hidden in closets, bureau and in the kitchen pantry, police found 431 Liberty Bonds of the \$100 denomination, twenty-one first and second mortgages on valuable real estate in the vicinity of her home, nine bank books showing deposits of large sums of money in various banks throughout the city, \$21 in bills of small denomination and silver and pennies which she had stuffed in cups, bowls etc. Besides the foregoing there were many articles of jewelry.

ent and Hill streets—"Gold Diggers of Broadway."

Warner Brothers, Hollywood at Wilcox—"Say It With Songs."

For West Coast Optician, Tenth and Western—"Big News."

For Boulevard, Washington and Vermont—"Four Devils."

THE WEATHER

LOCAL OFFICE. U. S. WEATHER BUREAU, Los Angeles, Oct. 13.—(Reported by H. B. Harvey, Meteorologist.) At 5 o'clock a.m., the thermometer registered 53.61 at 5 a.m., 53.91. Thermometer for the corresponding hours showed 44.44 at 6 a.m., 44.44. At 7 a.m., 44.44. At 8 a.m., 44.44. At 9 a.m., 44.44. At 10 a.m., 44.44. At 11 a.m., 44.44. At 12 m., 44.44. At 1 p.m., 44.44. At 2 p.m., 44.44. At 3 p.m., 44.44. At 4 p.m., 44.44. At 5 p.m., 44.44. At 6 p.m., 44.44. At 7 p.m., 44.44. At 8 p.m., 44.44. At 9 p.m., 44.44. At 10 p.m., 44.44. At 11 p.m., 44.44. At 12 m., 44.44.

For Los Angeles and vicinity: Fair Monday and Tuesday; no change in temperature.

STATE FORECAST

SAN FRANCISCO, Oct. 13.—Weather forecast: Fair, with light rain or drizzle Monday and Tuesday; with light rain or drizzle Wednesday; with light rain or drizzle Thursday; with light rain or drizzle Friday; with light rain or drizzle Saturday; with light rain or drizzle Sunday.

PART II - LOCAL SHEET - 18 PAGES

The Lancer

by
Harry Carr

THE last antelope in this region has been exterminated according to a report by County Game Warden Turner.

Old Indians have told me that they can remember when the herds of antelope were so huge that they filled San Jacinto Valley. They grazed like cattle. The Indians said that they were so many that the hunters killed what they wanted for meat at the edges of the herd and the others

Antelope Valley was always black with them. They would still be there except for the killing instincts of the white man. The California Indians killed only as many as they needed for food.

THE OCEAN FLOOR

The Hawaiian earthquakes are symptoms of the heeberebes that are shakin' the Pacific Ocean. Astonishing changes are taking place on the floor of the ocean.

The United States cruise Cleveland has reported soundings taken fifteen miles off the west coast of Hawaii.

coast of Nicaragua. The charts show the water to be thirty-seven fathoms deep at this point; but the soundings of the warship show that it is now only forty and one-half fathoms.

These changes are probably due to a tilt caused by submarine volcanic eruptions. It is observed that these startling changes in depths are on a line parallel to a chain of active volcanoes.

PEGGY'S EXAMPLE.
Peggy Hopkins Joyce seems to have started the whole family doing it. One of her numerous ex-husbands is now the ex-husband of another lady who—

GAS WASTAGE FIGHT TO BEGIN

California Will Seek Court as Ally in Struggle

Injunction to Be Requested at Hearing Today

Billions of Cubic Feet of Fuel Gas Go Into Air

(Continued from First Page)

Gas is prevalent in the oil fields and that the use of natural gas is prevalent over a large portion of the state of California. After setting out twelve zones affected by the suit, the petition says: "That each of said zones is and under said oil fields is and with said zones containing oil and gas under pressure in such manner that a portion of the oil is in the form of gasoline vapor, a portion of the gas dissolved in the oil, a portion of the gas exists as a liquid which becomes gas when the pressure is sufficiently lowered, a portion of the gas adheres to the surface of interfaces between the gases and liquids and a portion exists as free gas."

That when a well penetrates one of these zones, the gas pressure is released about the well causing oil and gas to begin to flow through the well toward the point of lower pressure at the well, and as the fluid flows toward the well there is a drop in the pressure throughout the zone.

That the opening of a well into any zone disturbs the pressure of gas in all parts of the zone, and the gas produced or allowed to escape from one well is replaced by gas and oil moved and drawn from all parts of the zone by the expansion of gas as aforesaid.

That gas underlying any given surface area is not fixed in place, but is volatile and moves from place to place within the interests of some man as the pressure is relieved.

That the relief is informed and believes and upon his information and belief believes that the increase in the flow of gas through and out of any well or wells penetrating any zone of said oil field above a ratio of one cubic foot of gas to a barrel of oil, the proportionate recovery of the oil in the zone of such zone is reduced, that the extent to which the ultimate recovery of oil in the zone is reduced varies with the increase in the rate of flow of gas, so that in some cases the ultimate loss of oil recovery from a zone is double what the loss of oil would be were a lower ratio of gas discharge maintained from wells penetrating said zone.

INJURY CHARGED

The petition then goes on to re-

late. That relief is informed and believes and upon his information and belief believes that the increase in the flow of gas through and out of any well or wells penetrating any zone of said oil field above a ratio of one cubic foot of gas to a barrel of oil, the proportionate recovery of the oil in the zone of such zone is reduced, that the extent to which the ultimate recovery of oil in the zone is reduced varies with the increase in the rate of flow of gas, so that in some cases the ultimate loss of oil recovery from a zone is double what the loss of oil would be were a lower ratio of gas discharge maintained from wells penetrating said zone.

That relief is informed and believes and upon his information and belief believes that the increase in the flow of gas through and out of any well or wells penetrating any zone of said oil field above a ratio of one cubic foot of gas to a barrel of oil, the proportionate recovery of the oil in the zone of such zone is reduced, that the extent to which the ultimate recovery of oil in the zone is reduced varies with the increase in the rate of flow of gas, so that in some cases the ultimate loss of oil recovery from a zone is double what the loss of oil would be were a lower ratio of gas discharge maintained from wells penetrating said zone.

That relief is informed and believes and upon his information and belief believes that the increase in the flow of gas through and out of any well or wells penetrating any zone of said oil field above a ratio of one cubic foot of gas to a barrel of oil, the proportionate recovery of the oil in the zone of such zone is reduced, that the extent to which the ultimate recovery of oil in the zone is reduced varies with the increase in the rate of flow of gas, so that in some cases the ultimate loss of oil recovery from a zone is double what the loss of oil would be were a lower ratio of gas discharge maintained from wells penetrating said zone.

That relief is informed and believes and upon his information and belief believes that the increase in the flow of gas through and out of any well or wells penetrating any zone of said oil field above a ratio of one cubic foot of gas to a barrel of oil, the proportionate recovery of the oil in the zone of such zone is reduced, that the extent to which the ultimate recovery of oil in the zone is reduced varies with the increase in the rate of flow of gas, so that in some cases the ultimate loss of oil recovery from a zone is double what the loss of oil would be were a lower ratio of gas discharge maintained from wells penetrating said zone.

GIRL ESCAPES LOSING SCALP

Fatality Narrowly Averted as Clothes Wringer Catches Hair

Ruth Speira, 15-year-old San Pedro girl living at 397 West Fourth street, owes her life to changing fashions of women's hair dress. Yesterday her tresses caught in the rolls of a power clothes wringer, while her mother, terror-stricken, was unable to shut off the power as it drew her head against the rolls. The screaming girl was released when the powerful wringer finally pulled the hair from the top of her head. Dr. A. J. Langan, police surgeon who gave her emergency treatment, said the fact that her hair was shortened from once having been bobbed saved Miss Speira from losing her entire scalp, with fatal results.

Railroad Commission, gives the figures of production, utilization and wastage of natural gas from all California fields for the first seven months of 1935 in cubic feet as follows:

Production, 299,533,000,000; utilization, 171,604,000,000; wastage (below), 127,929,000,000.

The figures for the Santa Fe Springs district alone for the same period named above are as follows:

Production, 88,417,000,000; utilization, 52,509,000,000; wastage (below), 35,908,000,000.

PANTAGES CASE GOES ON TODAY

(Continued from First Page)

sides declare that the case cannot possibly be left with the jury of six women and six men before ten days or two weeks.

This morning Tills Russo, the pretty little theater usherette who testified as she left the stand Friday afternoon, will appear again to complete her cross-examination. She probably will be on the witness stand for at least another hour.

"COACHING" CHARGED

Friday the girl testified that she was the usherette on the upper balcony and that Pantages brought Miss Pringle to the theater, seated her and then called for her in about half an hour. Then in another twenty minutes or so, the girl testified, she heard Miss Pringle's scream.

In her direct testimony Miss Russo declared that Pantages had coached her as to what story to tell the District Attorney. She declared that the theater man told her to say that Miss Pringle entered the balcony alone and left the same way and that the screams followed in about three minutes after she had departed from the balcony.

Miss Russo's story relative to the coaching was corroborated by Roy Keene, former assistant manager of the theater, who testified that Pantages had told him to see Miss Russo and tell her what to say. It was after Miss Russo left the stand Friday afternoon that she walked to the court doorway and there collapsed. She was removed to her home and physicians announced that she had fainted from excitement. The physicians declared she will be able to appear today.

WHAT GIRL SAYS

The Pantages trial got under way on the last day, after a complaint had been made by Miss Pringle, 17-year-old dancing girl, that she had been attacked in his little private office while she was attempting to obtain a booking for an act in the Pantages theaters.

Miss Pringle in her charge, which she repeated under oath at this trial, said that she was lured into the little office by Pantages, who told her that he wished to discuss her act. Once in the room, Miss Pringle testified, the millionaire theater man at once began the attack by throwing her to the floor. Some time later, she testified, he testified, she fainted and still later escaped from the room and ran screaming from the building.

Following Pantages' arrest by the police the theater man charged that the whole affair was a frame-up and an effort to blackmail him.

ers today when Dr. Frieda Buhl, judge of the Juvenile Court of Berlin and only woman justice in the republic, takes her place as a spectator at the trial of Alexander Pantages.

Dr. Buhl, who is in Los Angeles for a short sojourn, expects to make a study of American jurisprudence while here.

DOILEY APPEARS TO ENTER FLEA TODAY

Accused of having attempted to influence Ivan P. T. Samsonoff to change his testimony to favor Alexander Pantages in the case now pending in Superior Court charging the theater magnate with criminally attacking 17-year-old Miss Pringle, Harold Dooley, Los Angeles private detective, today is scheduled to appear before Superior Judge Aggeler to enter his plea.

Dooley was indicted by the county grand jury a week ago following the testimony of District Attorney's investigators and Samsonoff.

ence. She was active in the development of the Better Homes in America movement. She is past president of the General Federation of Women's Clubs, vice-president of the League of American Penwomen and a member of the Daughters of the American Revolution and the American Association of University Women. She is author of two widely known books.

RELIGIOUS PICTURES

The conference expressed a desire to meet again next year and appointed three continuing committees. Perhaps the most important of these was a committee on the use of motion pictures in religious education, of which Prof. Howard Le Sourd of Boston University was made chairman.

Mrs. Harriet Hawley Locher was named chairman of a committee to select a list of motion-picture classics for children, which will be made permanently available by the industry for special occasions when children's programs are desired.

Serving with Mrs. Locher were: Mrs. Mina Church Brann, Maryland; Miss Marilla W. Freeman, Ohio; Mrs. George C. Harrison, Rhode Island; Mrs. R. C. Hefelbower, Ohio; Mrs. Malcolm P. MacCoy,

DAM EXPERTS' REPORT DUE

(Continued from First Page)

nel was driven in under the landslide at a level about fifty feet above the stream bed. This tunnel has gone about 128 feet into the mountain. This would mean that its extremity is about 180 feet from the original exterior of the mountain before the abutment excavation was begun. At a point about 100 feet in this tunnel a vertical shaft is being driven down. Half-way in two cross-cut tunnels have been driven. In the original tunnel totally satisfactory rock conditions had not been found. There were places where fine-looking rock was located but it was cut by seams, one seam of about three inches thick being a soft clay material that could be picked out by the fingers. Further in toward the end of this tunnel another seam of rather soft material was located.

ESTIMATE DUE

Eaton pointed out, however, that this does not necessarily mean that satisfactory rock conditions cannot be found. It is entirely possible, he added, that a few feet more of tunnel might uncover good rock. Whether it can be found is a matter for the experts to decide. From this point on the tunnel is being driven on a level about halfway to the bottom, and another is being driven from the bottom. What the experts are doing is, virtually honey-combing the mountain with shafts and tunnels so as to get a good idea of the rock structure.

MANY SHAFTS SUNK

South of the main tunnel and from a higher bench a shaft is being driven. Last night it was down about seventy-eight feet from the floor of the excavation. This would be about 150 feet from the original line of the mountain side. From this shaft one tunnel is being driven on a level about halfway to the bottom, and another is being driven from the bottom. What the experts are doing is, virtually honey-combing the mountain with shafts and tunnels so as to get a good idea of the rock structure.

To date about 700,000 yards of material has been excavated from both the east and west abutments. The total contract estimate for this type of excavating is 700,000 yards. On the east abutment, Eaton said, some fine rock has been uncovered. Its quality is apparent even to the eye of the layman.

BRUNETTE WINS BEAUTY CROWN

(Continued from First Page)

military contests from which scores of entrants from various parts of the country were eliminated.

In the special classes Helen Fairweather of 1617 1/2 North Normandie avenue was adjudged the most beautiful blonde, and Helene A. of 627 North Orland avenue the most beautiful brunette. They each received a gown from a Hollywood shop. The nine other finalists were Gladys Jeans, Dixie Fields, Edith Sherman, Esther Garcia, Marie Desautelle, Ruby Berry, Editha Newton, Jerry Wayburn and Dolly Jarvis. Their consolation prizes were packages of cosmetics donated by Kathleen Clifford.

A significant sidelight on the contest was the fact that all three winners paraded with unbowed hair.

To travel on the Santa Fe is the Safest thing one can do

Besides the automatic or train control, on the Santa Fe you find:

- double track, securely ballasted
- heavy steel rails and treated ties
- smooth oiled roadbed, practically
- modern cars of steel
- a restful trip, minimum jolts and
- one management all the way
- Fred Harvey meal service
- Indian-detour and Grand Canyon
- The Chief - only extra fare
- California and Grand Canyon
- no extra fare.

RAMOS DUE TO FACE COURT

Once a figure in the diplomatic service of Mexico, Juan Ramos, recently head of the Latin-American branch of the United States National Bank, will be arraigned today before United States District Judge James.

In two indictments Ramos is charged with misapplication of bank funds, amounting to nearly \$50,000. He was arrested in Holland and returned to the United States voluntarily. He arrived in Los Angeles on Saturday, after providing \$15,000 bail in New York. The defendant is reported to be ill due to confinement in a prison in Holland.

WILD DRIVE RELATED OF POLICEMAN

Marine Force Officer to Face Jury on Charge of Reckless Motoring

Arrested while in police uniform driving his automobile along Harbor Boulevard, Charles M. Watts, 438 McDonald avenue, Wilmington, a member of the Los Angeles City Marine Police force, pleaded not guilty before Municipal Judge Bogue to charges of reckless driving and malicious destruction of property. He asked for a jury trial, which was set for November 5, next. Judge Bogue increased bail from \$250 to \$1000.

County Motor Vehicle Officers Dismukes and Goodson reported they arrested Watts after a chase of more than a mile, during which time he passed several cars on the wrong side of the street, drove close to the trees on the left of the street and hit one car, damaging it slightly. He was slowing his police whistle continually, they reported, declaring they smelled liquor on his breath after the arrest.

Artists to Hear Studio Official

At this evening's open forum the California Art Club will have as its principal speaker the East Indian technical director of the Metro-Goldwyn-Mayer studios, Lal Chand Mehra. The subject of the evening is to be "The Meaning of the East and the West." In his talk Mr. Mehra will tell of the new art revival in India and of how it has been influenced helpfully through European and American intercourse.

The forum program starts at 8 o'clock. The public is invited to gather with the artists of the Barnard Park Art Center. There is no charge for admission.

ELECTRIC CLUB TO HEAR THEATER MAN

Home R. Wright, manager of the Chinese Theater in Hollywood, will speak on "Scientific Business Management" at the regular meeting of the Electric Club today noon at the Billmore. Tony and Lee, just returned from "big-time" in the East, will furnish the entertainment of music and comedy. Frank J. Alrey, president, will preside.

LAIRD-SCHOBER TRAVELESE

the Well Dressed WOMAN walks with new understanding

Designed expressly for occasions when one walks or stands, Travelese prevents the strain, physical and mental which results when the shoe is not appropriate for the wear it receives.

The Travelese idea, an ingenious new creation, gives to these impeccable shoes the desirable support well-dressed women now demand in a walking shoe. The special design makes walking effortless, buoyant and graceful as youth. The extremely light-weight construction, the perfect balance, the scientific placing of the foot insure the unconscious ease essential to a distinguished appearance.

The special features which make these shoes the choice of women who insist upon chic, grace and complete ease in walking, are exclusive with Travelese.

Sponsored by LAIRD, SCHOBER & COMPANY, Travelese Shoes maintain in every particular of superlative style, beauty of workmanship and elegance of material, the high traditions of these master craftsmen of luxurious footwear.

TIMES WANT ADS

PEN POINT

None court power over those who fear it.

A woman is a person who thinks whatever she is doing is the phone.

Passenger planes aren't as well as the roads aren't kept up by the railroads.

But why build more roads when Congress won't pass the ones we have?

"All vegetation is feminine," says a botanist. About the papayas, of the paw family?

Centipede is a miniature. There's nothing that has legs except a chorus.

This dieting fad might be worse. Lovelorn swains still carry candy instead of spinach.

Don't diet too rigidly. Nature may take you away, thinking you don't want any more.

Few writers of fiction are rich, but think of the fun they have describing acquaintances they don't like.

Americanism: Making a machine to manufacture more articles at less cost; raising the price to pay for the advertisement necessary to sell the surplus.

When other timber gets the sap out it is cured. When political timber gets the sap out it is sufficient quantity, it is elected.

Stranger from Mars: "Don't understand your prohibition law. You make it illegal to be a piker."

The meaning of a green-light signal is known to everybody. Only you could say that in a green driver's signal.

Maybe the genius just needs a little crazy because of his obvious delight in work.

"Women," says O. B. Shaw, "have lost their sex charm. And have you noticed, old man, that green peaches have lost their flavor, also?"

John Coulter's bride confessed to an ambition to be an old-fashioned New England housekeeper. Will she dust behind the pictures every day?

A great French politician says the people are cattle. Maybe it just seems that way because of the bull that leads them.

Correct this sentence: "When I play an old maid," said he, "it's not because I think my wife more fortunate."

A drowning man clutching a straw is no more ridiculous than one on dry land jumping at conclusions.

RIPPLING RHYMES
Walt Mason

THE ILLITERATE
We all have troubles more or less, and we complain of stress, and talk about pains and aches, and of misfortune's scurry break, and of the crosses we must bear, and of the trials of grief and care. Today, while seated in the park, I heard a delegate remark, "I've never learned to read, and I never learned to write."

I had been weeping and groaning in my soul, since I was born, and I had been weeping and groaning in my soul, since I was born, and I had been weeping and groaning in my soul, since I was born.

When I heard that man's remark, off an impending note, when I heard that man's remark, off an impending note, when I heard that man's remark, off an impending note.

My troubles didn't seem so dark. I thought, "By jingo, I can go home, forgetting my uplifting poem, forgetting my uplifting poem, forgetting my uplifting poem."

And with the paper that I had, I don't remember I must pay some silly sort of tax today.

Some of all the tragic things I read of all the tragic things I read of all the tragic things I read of all the tragic things I read.

rumored wars on other shores, of men who will be candidates of scraps among other wars, weights, and forget my own things, and the man who has learned to read! He has no less gent, indeed, from the doorway of escape, he has no evil, haunting shape. I can chance to get away from when it is dusty gray, and endure what I have, and books provide a healing, but if I couldn't read them, I would be a bore.

LEASING BY COUNTY TO BE UP AGAIN

Renewed Requests Made for Renting of Space in Public Structures

Renewed attempts of private business interests to lease space in county buildings for their activities will be considered by the Board of Supervisors today. Such efforts in the past always have been discouraged.

The latest applicant is Ida M. Murphy, notary public, who wants to rent desk space in the Hall of records, on the Broadway floor near the elevators. Miss Murphy also searches records and handles real-estate deals. She asks to pay rent or deal with the Supervisors on a percentage basis.

Several attempts have been made to rent space for a cigar stand in the lobby of the Hall of Justice, and on county property adjoining the Courthouse.

The Board of Supervisors rents store rooms to business interests on Broadway, in locations where the rents exceed the price the county would have to pay for equal space elsewhere.

One minister offered to open a "Cupid's Bower" adjoining the marriage license bureau, where eager couples could be wed as soon they acquired their licenses. This person offered a liberal rental, or said he would deal with the county on a percentage basis.

Supervisors long since passed an ordinance preventing soliciting in county buildings, by agents, and have made efforts, mostly ineffectual, to prevent "runners" approaching couples about to be married with offers to take them to a judge who would "stop court" to perform a marriage ceremony, a practice which the local bar association recently protested.

Meanwhile county offices have become so congested that the Supervisors last week rented the entire Law Building, a twelve-story structure at 130 North Broadway, to provide more room for county business.

PERMISSION SOUGHT FOR SINGS IN PARK

Supt. Shearer of the Park Department has been requested by the Park Commission to investigate and make a recommendation on the application of Fred U. Hughes for permission to hold community sings on the slopes of Barnsdall Park in preparation for Christmas carols.

Hughes has an arrangement with the Board of Education by which he is inaugurating the East Hollywood Community Chorus. Meetings are to be held in the Los Feliz school auditorium and the plan is to rehearse and sing Christmas carols on Christmas Eve for near-by hospitals.

JOG TO BE ELIMINATED

Council has instructed the right-of-way department to acquire sufficient land at the intersection of Maple avenue at Washington street to eliminate the jog at that point and to establish Maple avenue with a width of eighty feet.

THE STORY OF THE WORLD WAR

241—The 3rd Division on the Mame.

by J. CARROLL MANSFIELD

DESERT PLAY TO OPEN SEASON

Indian Drama, "Fire," to be Given

Celeste Grunn as "Laela" in Aboriginal Photo

THE story of primitive life in the desert country is to inaugurate the winter season at the Palm Springs resort, beginning on November 9 and concluding on Armistice Day, November 11. A cast of sixty players, including Indians of the region, will participate.

PALM SPRINGS, Oct. 13.—Presentation of the ninth annual Desert Play here on November 9 will serve to inaugurate the winter season at this resort. It was announced today. The play will be repeated the afternoon of Sunday, November 10, and Monday, November 11, Armistice Day.

Sponsors of the spectacular open-air production have selected Mary Austin's Indian play, "Fire," to be presented as this year's Desert Play. Eight years ago the late Captain Holmes staged "Fire" as the first Desert Play. It was repeated the next year and then gave way to "Tahiti," which has been presented since.

The story of "Fire" is based on a celebrated legend of the Indians of the region relating to the subjugation of the warm-giving element to the use of mankind. It will be presented by a cast of sixty dramatic stars and Indians of the region.

Selection of the original drama for the 1929 presentation was made by the Palm Springs sponsors through a desire to perpetuate all of the legends of the region, as well as to vary the vehicle for patrons who make the pilgrimage to the resort year after year to see the Desert Play from all parts of the nation.

GRAPE SHIPMENTS AT EL CAJON SET MARK

EL CAJON, Oct. 13.—Record-breaking shipments of grapes are being made this year from El Cajon Valley. William Steil has started twenty-four cars east, with one more to be shipped, and Cecil York has shipped twenty-five cars to the eastern markets and expects to ship fifteen more. The Standard Fruit Company has shipped two carloads. These shipments show an estimated total of sixty-seven cars, as compared with fifty-two carloads that left the valley two years ago and held the record until this year.

ARMISTICE DAY PARADE TO BE BEST

Huntington Beach to Have
Seventeen Bands in Line;
Elaborate Floats Coming

HUNTINGTON BEACH, Oct. 13.—The Armistice Day celebration which is to be held in this city this year is taking on bigger aspects every day. It was revealed when it was made known that seventeen bands have been promised for the celebration. The arrangements for the bands have been completed. Walter McMillan, secretary of the committee in charge. There will be more bands in the parade than ever before in the history of the county-wide event. Schools throughout Orange county also will be well represented in the parade, according to Sidney H. Davidson, chairman of the special committee on school floats. More than eighty-five floats have been promised for the parade so far, according to McMillan. Arrangements are also being made for a street dance to be held on Ocean avenue during the evening. Daylight and night fireworks displays have been arranged to be shown here on July Fourth, last, and an afternoon football game at the high school stadium will be other entertainment features arranged for the day.

Chambers of commerce, civic organizations of all kinds and service clubs have arranged to assist in the parade and many have promised special floats. The motif is "California History."

The Armistice Day parade this year will be stressed as a peace event more than anything else, according to L. W. Blodgett, chairman of the executive committee and former Commander of the Huntington Beach Post of the American Legion.

PARENT-TEACHERS TO MEET AT MONROVIA

MONROVIA, Oct. 13.—Parent-teacher associations of the first district congress will hold their fall conference here on the 24th inst. with the Monrovia associations serving as hostesses.

The conference sessions will be held in the auditorium of the new Monrovia-Arcadia-Duarte High School, and the keynote of the conference will be "Parental Education" to be discussed by Dr. Regina Westcott and Mrs. H. R. Archibald.

This district comprises all of Los Angeles county and is constituted of 249 associations, all of which will be represented at the conference.

ALHAMBRA CONTINUES DAVIDSON IN SERVICE

ALHAMBRA, Oct. 13.—For the twelfth consecutive year J. L. Davidson has been elected to the presidency of the Alhambra library board. Rev. S. J. Kennedy has been re-elected secretary. Other members of the board, as appointed by the City Commission, are Mrs. O. Porter, Mrs. Thomas C. Gould and James Stuart.

CORTNER COMMANDS LEGION

Inglewood Post Selects Officers to Govern Organization for Coming Year

INGLEWOOD, Oct. 13.—James Cortner was last night elected Commander of Inglewood Post, No. 108, American Legion, succeeding Homer Challaux, who has just returned from the National convention of the organization.

Other officers elected are: Dave Bullock, First Vice-Commander; Jesse R. Hinson, Second Vice-Commander; Eugene Lohm, Adjutant; John McDowell, Historian; Elton D. Boone, Historian; Arthur Sallor, Sergeant-at-Arms; Ed Koffard, assistant Sergeant-at-Arms; Harry Whitworth, Chaplain; Stanley W. Thatcher, W. C. Fussman, Barney Aspinwall and Louis R. Hardin, Jr., Executive Committee.

Challaux, Past Commander, making his official report on the convention, said that of the 800 resolutions offered only about eighty were passed, and of the latter some 75 per cent had to do with aid for the disabled veterans. One of the more important of these urged a stipend of \$20 a month to those men permanently hospitalized but getting no other form of compensation, he said.

HUNTINGTON PARK

MAN KIWANIS CHIEF

Louis H. Hamilton

HUNTINGTON PARK, Oct. 13.—Louis H. Hamilton of this city, one of the best known members of the Kiwanis Club organization in the district, will be the next lieutenant-governor of Division No. 1 of the Kiwanis International, having been nominated unanimously at a meeting held at Hermosa Beach, the nominating committee reporting favorably upon Hamilton's candidacy. He will be elected to this office at the annual meeting to be held by the division next month in Long Beach, and will be installed into office in January.

Hamilton, who is a native of Bensalem, Ind., came to California in 1904 and has since been in business life in Huntington Park, becoming manager of the Huntington Park Finance Corporation.

Two years ago he was elected chairman of the board of directors of the City National Bank of Huntington Park, which position he still holds. He also is president of the Campfire Girls' organization, treasurer of the local Elks Lodge and of the Chamber of Commerce, having also served one year as president of the latter organization.

When the Kiwanis Club was formed here, he was a charter member and held the position of secretary for three years; was then elected president, serving one year, and has since been serving as president of the club.

Back in Indiana Hamilton was superintendent of the county schools of Jasper county for ten years; was in the banking business for thirty years, and during the World War was secretary of the Jasper County Council of Defense.

At his official position as Kiwanis lieutenant-governor, Hamilton will have in his division seventeen clubs—Los Angeles, Long Beach, Santa Monica, Huntington Park, Bell Compton, Downey, Torrance, Inglewood, East Suburbs, Beverly Hills, El Segundo, San Pedro, Lynwood, Clearwater-Holydale, South Gate, Watts and Hermosa Beach.

CORTNER COMMANDS LEGION

Inglewood Post Selects Officers to Govern Organization for Coming Year

INGLEWOOD, Oct. 13.—James Cortner was last night elected Commander of Inglewood Post, No. 108, American Legion, succeeding Homer Challaux, who has just returned from the National convention of the organization.

Other officers elected are: Dave Bullock, First Vice-Commander; Jesse R. Hinson, Second Vice-Commander; Eugene Lohm, Adjutant; John McDowell, Historian; Elton D. Boone, Historian; Arthur Sallor, Sergeant-at-Arms; Ed Koffard, assistant Sergeant-at-Arms; Harry Whitworth, Chaplain; Stanley W. Thatcher, W. C. Fussman, Barney Aspinwall and Louis R. Hardin, Jr., Executive Committee.

Challaux, Past Commander, making his official report on the convention, said that of the 800 resolutions offered only about eighty were passed, and of the latter some 75 per cent had to do with aid for the disabled veterans. One of the more important of these urged a stipend of \$20 a month to those men permanently hospitalized but getting no other form of compensation, he said.

FLORIDA STARTS BEATING BACK

California Fruit Exchange
Man Tells of Conditions
Fruit Fly Infestation Now Almost Eradicated

REDLANDS, Oct. 13.—Florida has hit the bottom of economic disaster after the Mediterranean fruit fly infestation, and is coming back. This is the belief of Stewart Kincaid, well-known Redlands fruit man, who has just returned from Florida. Kincaid has been two years in Columbus, O., in the office of the California Fruit Growers' Exchange. He started in as inspector of incoming cars of citrus fruit and during the last year has acted as a district manager. The Columbus office handles all exchange fruit arriving from Ohio, West Virginia and the territory immediately south of Chicago. The cars during season arrive at the rate of ten to twenty a day and must be inspected for condition before sale to the consignee. Fruit is already sold on arrival, or at least the Columbus house has a pretty fair assurance where it is to be placed. The California brands are gaining in favor, according to Kincaid, and the trade is ready to pay a premium for good standard grade.

TOUR 7000 MILES
The latter part of August Mr. and Mrs. Kincaid left Ohio by automobile and began a long tour that totaled more than 7000 miles before they reached Redlands.

They started north about the Great Lakes to Quebec and into Maine and New Hampshire from Boston. They visited the trade and slaved the fruit situation throughout the itinerary. Around Boston they did a considerable amount of sightseeing, including a trip to Plymouth Rock, New York, Washington, the Carolinas and Florida.

They were also in the latter State Archie M. Pratt, formerly of Redlands and now the big man in the citrus industry in Florida, took them on a long tour of his vine and toured the state with them. Government entomologists were seen, and a comprehensive study was made, possibly of the Mediterranean fly situation. The fruit fly seems now to be under control, Kincaid asserted today. No fly has been seen since August 7, he was told, and the 7000 to 8000 fly traps set out by the Federal eradication group have not caught an insect since that time.

The traps are for the purpose of a fly census and not as the principal eradication program.

INDICATIONS ENCOURAGING
"My personal opinion is that the fly can be eradicated," said Kincaid. "Of course, although no flies are in evidence this is not assurance that they do not exist. Probably there are flies still at large but the fact that they have so effectively disappeared is encouraging indication that the upper hand has been gained," the Redlands man added.

Kincaid was emphatic in his statement that California should have no fear of the insect. "It is more of a mental hazard than otherwise," he declared. "The economic loss would be serious if there were an infestation in California but commercially, I believe, the loss would be insignificant. It is extremely doubtful if the fly would ever become serious in our climate and certainly it would never bring about the expense for control the growers now must shoulder for the scale and mealy bug pests," he added.

SAN DIEGO WOMEN PRAISE FRUIT FLY QUARANTINE MEN

SAN DIEGO, Oct. 13.—Expressing satisfaction that the Mediterranean fruit fly which appeared in Florida has been kept out of California, the San Diego Women's Civic Center has adopted resolutions praising the work of officials who established and maintained the successful quarantine. The organization expressed its "appreciation and confidence" in the methods applied by the experts chosen by the government, State and county agricultural departments and especially by those operating in California.

The excellent work of our local agricultural officials, including those who guard our State boundary lines, international borders and ports, is highly praised in the resolution. Commendation is given especially to Robert H. McLean, County Horticultural Commissioner, whose observations in Florida and other fields and vigilance and educational work in this county cannot be surpassed. Felix Landis and James G. France of the farm bureau receive cordial praise for the inestimable amount of intelligent agricultural direction and rural progression the county has recorded.

PASADENA PLANS FLOWER SHOW

Costly Blooms Entered for Display

Little Betty Trank With Prime Chrysanthemums
Single orchid valued at \$6000 among entries in annual fall event at Crown City, which will open for four days, beginning the 23rd inst.

PASADENA, Oct. 13.—The only green chrysanthemum ever produced, and a single orchid valued at \$6000, are included in the avalanche of entries received for this city's annual Southern California Fall Flower Show, which opens the 23rd inst., under two tents to be pitched on the southern site at the south end of Garfield avenue.

Three departments of the City of Pasadena and a local Chamber of Commerce committee, are co-operating with the Pasadena Horticultural Association, sponsor of the event, in transforming the auditorium site into a garden area and in planning the location of exhibits.

"California Gardens," the show theme this year, will be carried out in the decorative scheme, S. T. Jarvis, horticultural association president, announced today.

"Entries have come from more than forty communities and twelve California counties, from Chico to San Diego," Jarvis reported. "Eighty per cent of the total space of more than 40,000 square feet has been allotted, but additional entries from private gardens and garden clubs will be welcomed. The show will receive entries until the 1st inst. Almost \$2000 in cash and sixty silver trophies, valued at \$1000, will be awarded prize winners."

Flood lights provided by the Municipal Light and Power Department will illuminate the exhibits at night. The show will extend for four days and is run on a non-profit basis.

Based on the valuable orchids and the rarities featured by the green chrysanthemums, plants from Mexico and Central America, including a cactus that jumps toward the passer-by, will form a picturesque background for thousands of colorful blooms.

DRAIN CHARGE ORDERED
Council has instructed the City Engineer to make changes in the plans for the Jefferson-street drain, Sec. 4, to eliminate deep curb faces and bring them to the normal height.

JUNIOR COLLEGE STILL IN AIR

Another Meeting to Crystallize Sentiment on District Plan to Be Called by Orange County Chamber

SANTA ANA, Oct. 13.—Learning that sentiment has apparently not yet crystallized on the union junior college problem definitely enough to warrant actual organization of such a district, members of the educational committee of the Associated Chambers of Commerce of Orange county will have another meeting in the near future.

This decision was reached last night at a meeting of the committee, and a few others interested in the matter, at the office of the Santa Ana Chamber of Commerce, and it was decided to invite to the next meeting members of the boards of education and school trustees, as well as the other interested, including the County Supervisors.

At this meeting, the date of which will be announced by R. A. Lake of Garden Grove, chairman, reports will be expected from two subcommittees appointed last night. One, consisting of A. Haven Smith of Orange and J. A. Clapes of Huntington Beach will report on the probable curriculum of the proposed junior college. The other will bring in an estimate of the probable cost of the project. This subcommittee is composed of W. C. Jerome, County Auditor; D. K. Hammond, principal of the Santa Ana Junior College, and Joseph Vavra of Huntington Beach.

After the next meeting a recommendation may also be made to provide funds for a county-wide survey of the junior college needs. The desirability and wisdom of this was emphasized several times at last night's meeting by Dr. John Ball of the Santa Ana Board of Education and others, who declared that at the present time the people did not appear to know much about the junior college question, and did not know what their needs were.

Most of those present agreed on the need of a survey, but there appeared to be disagreement on whether it should be made before or after the district is organized. R. P. Mitchell, county superintendent of schools, pointed out that those who want a union junior college should think and look ahead, and not jump into the matter without knowing what will come after. He reminded those present that a bond issue would have to be passed, but that some districts in the county had been unable to pass bonds even for elementary schools.

HOLLYWOOD STARS WIN COAST LEAGUE PENNANT

WEEKS RALLY IN EIGHTH TO UPSET MISSIONS, 8-3

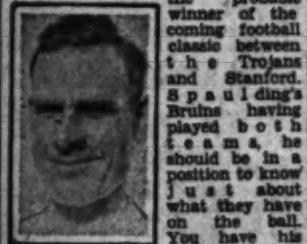

Run Splurge Sinks Red Hopes Before 15,000 Fans; Rumlur Hero of Vittmen Victory

BY BOB RAY
The Hollywood Stars, champions of the Pacific Coast League, 1928, and just that down in the books, for the scrapping Shells, rallied themselves to that honor out at Wrigley yesterday afternoon when they thrilled 15,000 fans with a come-back in the eighth inning that broke a 3-0-3 tie and sent the Mission Reds without a trace under an 8-3 score.

SPAULDING SAYS BIG TILT EVEN

Bruin Coach Believes Trojan-Card Game is Toss-up

BY FRANK ROCHER
"It's a toss up," that was "Bunk" or Bill Spaulding's reply yesterday when pressed for his opinion as to the probable winner of the coming football classic between the Bruins and the Trojans.

COACH SPAULDING

Spaulding also added the following: "I believe the team that wins the Stanford-Trojan game will be the one that gets the Bruin. Both teams have a world of power. Stanford works smoother for this time of the season of offense than any other Stanford team that I have ever seen. They slipped by us on plays for yards where the Bruins had to knock us down to get through." Spaulding pointed out that while the S.C. team ran up the larger score on the Bruins, he believed it was because they were more keyed up for that game. The Bruins last Saturday, the Bruin line looked better against Stanford for that reason, he stated. In addition the U.C.L.A. boys had two games under their belts, and were in better condition than they were in the opening contest of the season. The Bruin mentor looks for a bitter battle at Palo Alto, which he believes will bring out some of the best football in the country.

TEARS FOR TROJANS

California Proves Capable of Handling Battle at Seattle; Varnell Praises Locals

BY PAUL LOWRY
There seems to be a general consensus of master football minds following the defeat of Southern California handed Washington on Saturday that the Trojans will be able to take care of themselves this year. Varnell, Stanford and Idaho among the undefeated leaders of the Pacific Coast Conference. Stanford had a romp in its 57-0 licking of U.C.L.A., and appeared to put no more spirit into its play—perhaps less than in a practice scrimmage.

IDAHO GETS TEST
Idaho, coached by the old Southern California hero, Leo Calland, gets a real test the coming weekend when it faces the veteran Oregon team at Portland. If it can get by the Oregonians, who were beaten by Stanford, 33 to 7, Mr. Calland's boys undoubtedly will finish in the first division, and might even disturb the Trojans' serene view of life here late next month. The only other conference

POIX AND SIMMONS TO PLAY IN EXHIBITION GAME HERE

Joe Simmons and Danny Poix, whose sensational bat work have been the basis of the world's series and helped materially in the Red Sox's 4-3-1 lead over the Chicago Cubs, will play in an exhibition game at Wrigley Field on Tuesday night. It was announced yesterday by Oscar Reiser, president of the Sox, that the two stars will be joined by Babe Ruth and Lou Gehrig in a game to be played at Wrigley Field on Tuesday night. The game will be a double bill, with the Sox playing the first game and the Cubs the second. The game is expected to draw a large crowd, and is being promoted by the local press.

KANSAS CITY "BLUES" ANNEX JUNIOR WORLD SERIES FLAG

ROCHESTER (N. Y.) Oct. 13. (AP)—Kansas City, champions of the American Association, won the junior world series here today by defeating Rochester, International League champions, in the ninth and final game of their series by 8 to 5 in eleven innings. The game was one of the most exciting of the series, flat fights between players and a near riot at the end of the game giving more than 10,000 fans much more than they had bargained for.

The Kansas City Blues overcame a four-run lead to win and for the second day in succession forced Tex Carleton to leave a job unfinished. The Blues, four runs behind, scored twice in the sixth inning on Kube's walk followed by Tucker's home run over the right-field fence. In the seventh inning after Rochester had scored, once in its half of the sixth, the Blues added three more on Carleton's wildness. Score: Kansas City, 8 runs, 7 hits, 1 error; Rochester, 5 runs, 8 hits, no errors. Batteries—Nelson, Murray, Day, Davis and Peters; Carleton, Derringer and Florence, Morrow.

TROJANS RETURN TODAY

Edelson Due for Cheers of Fans; Entire Squad in Good Shape; Jones to See Cards Perform

BY BRAVEN DYER
EN ROUTE TO LOS ANGELES WITH TROJAN FOOTBALL TEAM. GERRER (Cal.) Oct. 13. (Exclusive)—If there are going to be any boys' sports passed out when the victorious University of Southern California football squad arrives at the Southern Pacific Station tomorrow morning at 8:30 o'clock, be sure and have the folks have a big bunch of roses or heliotrope for this boy Harry Edelson.

In the rush of writing about Saturday's track meet with Washington, some of us overlooked a few matters, which wasn't surprising inasmuch as the train pulled out one hour after the game closed, and it took twenty minutes to get from the stadium to the depot.

Edelson's blocking from start to finish was the most deadly Troy has ever exhibited, and that goes for Lloyd Thomas and Bert Heister, who were considered the ace and king of interferences developed by Howard Jones. There is no other

VAN RYN WINNER OVER GORCHAKOFF IN MEXICO

MEXICO CITY, Oct. 13. (AP)—John Van Ryn of South Orange, N. J., member of the American Davis Cup team, won the men's singles championship of Mexico today by defeating Ben Gorchakoff, Occidental College star, in a hard-fought final match. The scores were 6-3, 4-6, 6-1, 6-5, 6-4.

Marion Williams, an almost unknown player at the start of the tournament, defeated Marjorie Gladman, Little Santa Monica (Cal.) star, in straight sets to capture the women's singles title. The scores were 7-5, 7-5.

Van Ryn and Miss Gladman won a straight-set match to take the mixed doubles title. They defeated J. Gilbert Hall, South Orange, N. J., and Edith Cross, San Francisco, 6-7, 6-2.

THE EAGLE AND THE CAGLE - by Feg Murray

THE CAPTAIN OF THE WEST POINT ELEVEN IS LOOKING FORWARD TO HIS GREATEST SEASON.

BEARS EN ROUTE EAST

California Football Team Speeds Toward Atlantic Coast for Tilt With Pennsylvania

BY ED R. HUGHES
EN ROUTE WITH CALIFORNIA FOOTBALL TEAM (Nevada) Oct. 13. (Exclusive)—Members of the University of California football team are spending this bright Sabbath day traveling through the imperial and sovereign State of Nevada and it is plenty dusty.

Some of the boys are out of the native State of California for the first time, and everything they see is new and strange. The athletes who were brushed in the battle with Washington are nursing wounds, and they should be all okay by the time they reach Philadelphia next Wednesday.

Harry Oll, husky guard, came out Saturday with a bad shoulder. It is doubtful if he can play next Saturday. Fred Schlichting, a halfback, had an arm dislocated in the closing minutes of the scrap, so he did not take the trip. That was tough luck for him, for he looked so good the few minutes he was in the game he was a cinch to make the trip.

Coach Price and the boys have been trying to figure out why California was penalized so often for being offside. Some of those penalties hurt. They have about decided the boys were so used to starting with Capt. Kiegeles snapping the ball they did not time them.

MACKS, BRUINS RENEW ACTION

President and Cabinet to Watch Ball Tilt

Athletics Need One Game to Cinch Laurels

Chicago Must Win Three in Row to Collect

BY ALAN GOULD
Associated Press Sports Writer
PHILADELPHIA, Oct. 13. (AP)—With the nation's fandom rousing its interest upon baseball's great spectacle, the first fan of the land, President Hoover, will see the Athletics and Cubs renew their world's series hostilities in the fifth game tomorrow afternoon at Shibe Park.

The President and his party, including Mrs. Hoover and Cabinet members, may witness the decisive engagement for the Athletics, leading three games to one, need only one more victory to clinch the series and add 1929 to the other triumphant years of Connie Mack's regime—1910, 1911 and 1913.

TEAMS REST UP
Today was an armistice in the series battle, with the combatants as well as noncombatants somewhat shell-shocked by the reverberations of the fourth game's spectacular cannonading by the Athletics.

Tomorrow's engagement will decide whether Connie Mack, the aged leader of the A's, is to reach his long-cherished goal of a fourth world's championship, something no other manager has ever accomplished, without further shift in the bat-dogwood, or whether the Cubs have the resources to stage another comeback after having absorbed the worst battering in series history.

The Cubs must win three in a row now to save the National League's prestige from absorbing another knockout blow. The senior circuit already has lost eleven out of the last twelve world's series games to the representatives of the American League. A three-straight comeback has been done twice in twenty-six other series battles since 1907 and as recently as 1925 by the Pittsburgh Pirates, but on this basis the chances are 13 to 1 against it, especially the way the Athletics
